Todes, Vanessa Watson, 1986-01-01 *Contemporary South Africa and the Political Economy of Regional Development* Methembe Mdlalose, Isaac Khambule, Nene Ernest Khalema, 2025-02-21 South Africa's struggle in balancing its domestic needs while playing a dynamic developmental role in the African region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid As such understanding the complexities of the global economy and of South Africa's place in it is of great importance This book builds upon an existing body of literature which has demonstrated that while the post apartheid South African state has recast its nation building goals with advances having been made notably in the area of a stellar post apartheid constitution policy directives and democratic political integration economic integration and policy implementation presents a projection of captured interests where big business concerns are entrenched in the post apartheid state's apparent neo liberal turn The main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for South Africa and indeed for the study of the political economy of regional development in the country from the prism of South Africa as a global capitalist state These trends include the impact of globalisation regionalisation and the marginalisation of South Africa and indeed the African continent in the global economy thus unpacking the possible role that South Africa might play in regional development This volume will be a valuable resource to academics researchers and students in the fields of regional studies economics and political theory as well as policymakers planners and local economic development practitioners *Transforming Settlement in Southern Africa* Chris de Wet, 2020-03-31 This volume examines the ways in which changing political and economic processes impact upon patterns of population movement and settlement It focuses on the southern African region as it has moved from the experiments of the early independence era through civil war and refugee flight into the current era characterised by globalization and the demise of apartheid Focused case studies from across the region deal with specific aspects of these transformations and their policy implications *Global Regionalization* H. This book brings together a broad range of research that interrogates how real estate market analysis, finance, planning and investment for residential and commercial developments across the African continent are undertaken. In the past two decades, African real estate markets have rapidly matured, creating the conditions for new investment opportunities which has increased the demand for a deeper understanding of the commercial and residential markets across the continent. The chapters consider issues that pertain to formal real estate markets and the critical relationship between formal and informal property markets on the continent. With contributing authors from South Africa, Ghana, Nigeria, Uganda, Kenya and Tanzania, the book considers the achievements of African real estate markets while also highlighting the complex central themes such as underdeveloped land tenure arrangements, the availability of finance in both the commercial and residential sectors, rapidly growing urban areas and inadequate professional skills. This book is essential reading for students in real estate, land management, planning, finance, development and economics programs who need to understand the nuances of markets in the African context.
