Regression Analysis A Constructive Critique:

Regression Analysis Richard A. Berk, 2003-07-17 Berk has incisively identified the various strains of regression abuse and suggests practical steps for researchers who desire to do good social science while avoiding such errors Peter H Rossi University of Massachusetts Amherst I have been waiting for a book like this for some time Practitioners especially those doing applied work will have much to gain from Berk's volume regardless of their level of statistical sophistication Graduate students in sociology education public policy and any number of similar fields should also use it It will also be a useful foil for conventional texts for the teaching of the regression model I plan to use it for my students as a text and hope others will do the same Herbert Smith Professor of Demography Sociology University of Pennsylvania Regression is often applied to questions for which it is ill equipped to answer As a formal matter conventional regression analysis does nothing more than produce from a data set a collection of conditional means and conditional variances The problem though is that researchers typically want more they want tests confidence intervals and the ability to make causal claims However these capabilities require information external to that data themselves and too often that information makes implausible demands on how nature is supposed to function Convenience samples are treated as if they are random samples Causal status is given to predictors that cannot be manipulated Disturbance terms are assumed to behave not as nature might produce them but as required by the model *Regression Analysis A Constructive Critique* identifies a wide variety of problems with regression analysis as it is commonly used and then provides a number of ways in which practice could be improved Regression is most useful for data reduction leading to relatively simple but rich and precise descriptions of patterns in a data set The emphasis on description provides readers with an insightful rethinking from the ground up of what regression analysis can do so that readers can better match regression analysis with useful empirical questions and improved policy related research An interesting and lively text rich in practical wisdom written for people who do empirical work in the social sciences and their graduate students David A Freedman Professor of Statistics University of California Berkeley [Interrogating Illiberal Peace in Eurasia](#) Catherine Owen, Shairbek Juraev, David Lewis, Nick Megoran, John Heathershaw, 2018-01-09 The collapse of the USSR wrought dramatic changes in Eurasia both in terms of the structure of state power within the region and the ways in which Western states and international organisations engaged with it Analyses of conflict in this region remain rooted in supposed global models often assuming that patterns of state failure are due to resistance to the liberal model of peacebuilding This book sets out a challenge to these assumptions and framings It not only questions but resolutely dismisses the notion that the peacebuilding methods favoured by Western states remain the most salient in Eurasia Instead it develops a framework that seeks to conceptualise the ways in which non liberal actors contest or transform globally promoted norms of conflict management and promote alternative ones in their place Authoritarian Conflict Management ACM consists of an ensemble of norms and practices in which non liberal actors attempt to exert sustained hegemonic control over the local

discursive economic and spatial realms in a given territory With case studies ranging from Afghanistan to Uzbekistan Xinjiang to the Caucasus the chapters shed light on the ways in which local and regional actors enact practice of ACM in order to impose stability in conflict prone localities thereby challenging the Western led consensus known as the liberal peace

Dangerous Trade Jennifer Erickson, 2015-05-19 The United Nations s groundbreaking Arms Trade Treaty ATT which went into effect in 2014 sets legally binding standards to regulate global arms exports and reflects the growing concerns toward the significant role that small and major conventional arms play in perpetuating human rights violations conflict and societal instability worldwide Many countries that once staunchly opposed shared export controls and their perceived threat to political and economic autonomy are now beginning to embrace numerous agreements such as the ATT and the EU Code of Conduct Jennifer L Erickson explores the reasons top arms exporting democracies have put aside past sovereignty security and economic worries in favor of humanitarian arms transfer controls and she follows the early effects of this about face on export practice She begins with a brief history of failed arms export control initiatives and then tracks arms transfer trends over time Pinpointing the normative shifts in the 1990s that put humanitarian arms control on the table she reveals that these states committed to these policies out of concern for their international reputations She also highlights how arms trade scandals threaten domestic reputations and thus help improve compliance Using statistical data and interviews conducted in France Germany Belgium the United Kingdom and the United States Erickson challenges existing IR theories of state behavior while providing insight into the role of reputation as a social mechanism and the importance of government transparency and accountability in generating compliance with new norms and rules

application and presents some discussion of methodological and analytic issues related to its adoption

Nonproliferation Policy and Nuclear Posture Neil Narang, Erik Gartzke, Matthew Kroenig, 2015-10-08 This volume examines the causes and consequences of nuclear postures and nonproliferation policies The real world importance of nuclear weapons has led to the production of a voluminous scholarly literature on the causes and consequences of nuclear weapons proliferation Missing from this literature however is a more nuanced analysis that moves beyond a binary treatment of nuclear weapons possession

to an exploration of how different nuclear postures and nonproliferation policies may influence the proliferation of nuclear weapons and subsequent security outcomes This volume addresses this deficit by focusing on the causes and consequences of nuclear postures and nonproliferation policies It is the aim of this book to advance the development of a new empirical research agenda that brings systematic research methods to bear on new dimensions of the nuclear weapons phenomenon Prior to the contributions in this volume there has been little evidence to suggest that nuclear postures and policies have a meaningful impact on the spread of nuclear weapons or security outcomes This book brings together a new generation of scholars advancing innovative theoretical positions and performing quantitative tests using original data on nuclear postures nonproliferation policies and WMD proliferation Together the chapters in this volume make novel theoretical empirical and methodological contributions to the field of nuclear weapons proliferation This book will be of much interest to students of nuclear proliferation international relations and security studies
