**Redefining Tandem Language and Culture Learning in Higher Education** Claire Tardieu, Céline Horgues, 2019-08-21 This book

provides a comprehensive critical account of tandem learning charting its evolution from its origins in European educational settings to modern programs offering new perspectives on the approach's role within higher education. Taking stock of the ways in which increased globalization has produced new linguistic and sociocultural realities, the volume begins by looking back at the development of tandem learning over the last several decades, growing out of a need to create more opportunities for L2 learners to communicate in their target language. The book then examines the different learning objectives and learning outcomes of tandem learning arrangements, moving toward a discussion of tandem learning's potential role in shaping language policy and the unique challenges involved in implementing tandem programs at higher education institutions. The final section of the book brings the previous discussions together to consider new tools and technology and the ways in which they can better equip language educators to implement tandem learning in their own practice. Highlighting tandem learning's potential to promote multilingual and multicultural learning on a global scale, this volume will be of particular interest to students and researchers in intercultural communication, language education, multilingualism, and applied linguistics.

*Democracy Reinvented* Hollie Russon Gilman, 2016-01-05 Participatory Budgeting: the experiment in democracy that could redefine how public budgets are decided in the United States. *Democracy Reinvented* is the first comprehensive academic treatment of participatory budgeting in the United States, situating it within a broader trend of civic technology and innovation. This global phenomenon, which has been called "revolutionary civics in action" by the New York Times, started in Brazil in 1989 but came to America only in 2009. Participatory budgeting empowers citizens to identify community needs, work with elected officials to craft budget proposals, and vote on how to spend public funds. *Democracy Reinvented* places participatory budgeting within the larger discussion of the health of U.S. democracy and focuses on the enabling political and institutional conditions. Author and former White House policy adviser Hollie Russon Gilman presents theoretical insights, in-depth case studies, and interviews to offer a compelling alternative to the current citizen disaffection and mistrust of government. She offers policy recommendations on how to tap online tools and other technological and civic innovations to promote more inclusive governance. While most literature tends to focus on institutional changes without solutions, this book suggests practical ways to empower citizens to become change agents. *Reinvesting in Democracy* also includes a discussion on the challenges and opportunities that come with using digital tools to re-engage citizens in governance.
