To Build a Wall Gregg Ivers, 1995 To Build a Wall represents the first extensive study of the effect of Jewish interest groups on church state litigation Ivers carefully traces the evolution of the American Jewish Committee the American Jewish Congress and the ADL from benevolent social service agencies to powerful organized interest groups active on all fronts of American politics and public affairs He draws extensively upon original sources and archival materials from each organization personal interviews over a five year period as well as the personal files and papers of Leo Pfeffer the lead counsel or amicus curiae in nearly every establishment clause case from the late 1940s through the early eighties Ivers concludes that organized interests can and do have critical influence in the legal process but that organizational needs and external demands result in a more ad hoc less planned approach to law and litigation than much previous scholarship has suggested Ivers also argues that the ethnic economic and religious differences that led to the formation of competing Jewish organizations eighty years ago continue to drive a

dynamic pluralism within the Jewish community manifest in part in divergent approaches to litigation and public affairs

Whose America? Jonathan Zimmerman, 2005-11-30 What do America's children learn about American history American values and human decency Who decides In this absorbing book Jonathan Zimmerman tells the dramatic story of conflict compromise and more conflict over the teaching of history and morality in twentieth century America In history whose stories are told and how As Zimmerman reveals multiculturalism began long ago Starting in the 1920s various immigrant groups the Irish the Germans the Italians even the newly arrived Eastern European Jews urged school systems and textbook publishers to include their stories in the teaching of American history The civil rights movement of the 1960s and 70s brought similar criticism of the white version of American history and in the end textbooks and curricula have offered a more inclusive account of American progress in freedom and justice But moral and religious education Zimmerman argues will remain on much thornier ground In battles over school prayer or sex education each side argues from such deeply held beliefs that they rarely understand one another's reasoning let alone find a middle ground for compromise Here there have been no resolutions to calm the teaching of history All the same Zimmerman argues the strong American tradition of pluralism has softened the edges of the most rigorous moral and religious absolutism
