Outstanding should be on every home educator's reference bookshelf. Homeschooling Today. This educational bestseller has dominated its field for the last decade, sparking a homeschooling movement that has only continued to grow. It will instruct you step by step on how to give your child an academically rigorous, comprehensive education from preschool through high school. Two veteran home educators outline the classical pattern of education, the trivium, which organizes learning around the maturing capacity of the child's mind. With this model, you will be able to instruct your child in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Newly revised and updated, *The Well-Trained Mind* includes detailed book lists with complete ordering information, up-to-date listings of resources, publications, and Internet links, and useful contact information. Slavic Review ,1999 American quarterly of Soviet and East European studies varies **Forthcoming Books** Rose Arny, 1997 **Open Architecture Curricular Design in World Language Education** Andrew R. Corin, Betty Lou Leaver, Christine M. Campbell, 2025 A guide to a textbook-free approach to world languages curriculums that will improve learning outcomes. Open architecture curricular design (OACD) is a textbook-free curricular design framework for teaching and learning world languages that integrates all the best practices in world language education to enhance learning efficiency and effectiveness. As editors and pioneers of this method, Corin Leaver and Campbell define OACD for world language instructors and second language acquisition researchers from middle school through higher education and beyond. The book's chapters demonstrate how to use OACD for a wide variety of languages and proficiency levels in government service, academy, and university programs. Topics covered include the use of authentic texts at all levels, learner involvement in the selection of content and activities, and methods of assessment and program evaluation.
