Freedom Philip Clayton, 2009 Clayton defends the idea of human freedom as an emergent property against various forms of reductionism especially as evidenced in the writings of some philosophers Working through an enormous amount of scholarly literature much of it in the area of evolutionary biology he tries to show how human freedom even the freedom implicit in religious transcendence can be thought to emerge from more primitive levels His lectures and this book are outstanding examples of the constructive dialogue among natural science philosophy and religion of the sort that the Frankfurt Lectures have sought to promote Book Jacket

Final Freedom Michael Vorenberg, 2001-05-21 This book examines emancipation after the Emancipation Proclamation of 1863 Focusing on the making and meaning of the Thirteenth Amendment Final Freedom looks at the struggle among legal thinkers politicians and ordinary Americans in the North and the border states to find a way to abolish slavery that would overcome the inadequacies of the Emancipation Proclamation The book tells the dramatic story of the creation of a constitutional amendment and reveals an unprecedented transformation in American race relations politics and constitutional thought Using a wide array of archival and published sources Professor Vorenberg argues that the crucial consideration of emancipation occurred after not before the Emancipation Proclamation that the debate over final freedom was shaped by a level of volatility in party politics underestimated by prior historians and that the abolition of slavery by constitutional amendment represented a novel method of reform that transformed attitudes toward the Constitution
