Sacred Places And Profane Spaces Essays In The Geographics Of Judaism Christianity And Islam:

Sacred Places and Profane Spaces Jamie S. Scott, Paul S. Housley, 1991-09-30 The editors and contributors to this pioneering volume have focused the lense of geography on new territory as they inquire critically into the spatial dimensions of Judaism Christianity and Islam making this interdisciplinary project truly a new idea in the study of comparative religion and human geography Editors Jamie Scott and Paul Simpson Housley have organized the study into three broad areas of inquiry and have coined the term Geographics to encompass the three distinct yet interrelated spatial dimensions implicated in the study of religion The first area concerns the literal role played by specific sites regions or geographical phenomena in the development of the three religions The focus here is on city wilderness river valley and mountain as well as flood earthquake whirlwind and famine with attention devoted to methodological epistemological and ontological issues The symbolic or interpreted role played by these same specific entities in the three religions is the second notion to be explored The third focus is an inquiry into the geography of prophetic and apocalyptic visions and the role of geographical imagination in the development of religious self understanding This interface of natural and historical geography with the geography of the prophetic and apocalyptic imagination produces a graphic sometimes terrifying landscape The volume s nine essayists have approached their chapters with this threefold schematization in mind so that the book consists of one study devoted to each of these dimensions in Judaism Christianity and Islam as well as an introduction and afterword by the editors Each essay discusses the relationship of the spatial and the sacred in scripture and in subsequent literary and theological reflection upon scriptural themes The range of topics and variety of approaches used reflect the interpretive ambiguities that stem from the unique social political and economic functions conferred on places and spaces of particular significance in the life and thought of a religious tradition or community The section on Judaism explores Jewish agricultural settlements in Palestine the Temple Mount al haram al sharif and the Garden of Eden Indepth looks at Finland women s geography and the apocalyptic world comprise the section on Christianity Iranian feasting and pilgrimage circuits modern Egypt and sacred geography are assessed in the final section on Islam This carefully edited innovative study offers a unique approach to the study of religion and will be read profitably by scholars and students of religion and geography **Handbook of the**

and mediums It also offers views from disciplines outside of geography including from sociology anthropology religious studies and media and communications which demonstrates the contributions of geographers of religion to wider intellectual conversations and debates

Heavenly Space in Hebrews and Its Jewish and Christian Environment Stephen C. Wunrow, 2025-06-12 Stephen Wunrow addresses the pressing question of what the author of Hebrews meant by his descriptions of heaven arguing that the author intended his references to heavenly space to be interpreted as realistic descriptions of a real place Wunrow posits that language about heaven is neither metaphor nor a description of a place outside the creation by examining other early Jewish and Christian texts that narrate or describe humans ascending into heaven Given the nature and the function of heavenly space as described in these texts Wunrow suggests it is most probable that the authors of the texts intended their descriptions of heavenly space to be understood as realistic Wunrow thus explores 1 and 2 Enoch 4 Ezra 2 and 3 Baruch the Apocalypse of Abraham the Testament of Levi the Testament of Abraham the Ascension of Isaiah and Revelation investigating how other roughly contemporary authors described heavenly space and considering that the rhetorical aims of most of these authors fail unless their readers understand their descriptions of heavenly space in realistic ways Turning then to examine Hebrews Wunrow suggests that while the letter does contain unique features and rhetorical aims it also fits comfortably with other early Jewish and Christian texts that describe humans ascending into heaven in a realistic manner He concludes with reflections on how this conclusion helps to clarify other topics in Hebrews including atonement and eschatology

Violence, Scripture, and Textual Practices in Early Judaism and Christianity Raanan Shaul Boustani, Alex P. Janssen, Calvin J. Roetzel, 2010 This volume analyzes the emergence of Jewish and Christian discourses of religious violence within their Roman imperial context with an emphasis on the shared textual practices through which authoritative scriptural traditions were redeployed to represent legitimate and indeed sacralize violence

The Politics of Sacred Space Michael Dumper, 2002 Dumper explores how religious and political interests compete for control of the Old City of Jerusalem and how this competition affects the Middle East conflict as a whole

Pezzoli-Olgia, 2014-10-16 Religious Representation in Place brings together an interdisciplinary group of scholars from the Humanities and Sciences to broaden the understanding of how religious symbols and spatial studies interact The essays consider the relevance of religion in the experience of space a fundamental dimension of culture and human life

Judaism and Human Geography Yossi Katz, 2021-05-11 Judaism is a religion and a way of life that combines beliefs as well as practical commandments and traditions encompassing all spheres of life Some of the numerous precepts emerge directly from the Torah the Law of Moses Others are commanded by Oral Law rulings of illustrious Jewish legal scholars throughout the generations and rabbinic responsa composed over hundreds of years and still being written today Like other religions Judaism has also developed unique symbols that have become virtually exclusive to it such as the Star of David and the menorah This book argues that Judaism impacts human geography in significant ways it shapes the environment and space of its believers thus creating a unique Jewish geography

Sacred Economies Michael John Walsh, 2010 Buddhist monasteries in medieval China employed a variety of practices to ensure their ascendancy and survival Most successful was the exchange of material goods for salvation as in the donation of land which allowed monks to spread their teachings throughout China By investigating a variety of socioeconomic spaces produced and perpetuated by Chinese monasteries Michael J Walsh reveals the sacred economies that shaped early Buddhism and its relationship with consumption and salvation Centering his study on Tiantong a Buddhist monastery that has thrived for close to seventeen centuries in southeast China Walsh follows three main topics the spaces monks produced within and around which a community could pursue a meaningful existence the social and economic avenues through which monasteries provided diverse sacred resources and secured the primacy of Buddhist teachings within an agrarian culture and the nature of transactive participation within monastic spaces which later became a fundamental component of a broader Chinese religiosity Unpacking these sacred economies and repositioning them within the history of religion in China Walsh encourages a different approach to the study of Chinese religion emphasizing the critical link between religious exchange and the production of material culture

Israel in a Turbulent Region Tore Petersen, 2019-03-07 This anthology examines and deconstructs what Israeli security looks like and how its various security identities have evolved both before the establishment of the state and in the years and decades since 1948 It casts light on how aspects of Israel's foreign relations have been shaped as much by internal politics as by external challenge Further not only does it answer the questions surrounding Israel's past but examines carefully what type of country it has now become Compared to much of the turbulence in the region Israel's diplomacies have been remarkably resilient and inventive With the background of 100th anniversary of the Balfour declaration this book is a multidisciplinary study using several different methodological approaches from discursive analyses to theories of memories and identity to interviews with Israeli soldiers in the field to a legal approach to the topic as well as International Relations studies and traditional archival studies South Africa was one of

Israel's main partners in terms of security cooperation and weapons research and development until the fall of the apartheid regime. This has been compensated with Israel opening up diplomatic relations with China 1991 and India 1992 and extending its ties with Japan. While the EU often criticize Israel's policies against the Palestinians this is mostly rhetoric as for practical purposes Israel is like a member of the EU. This comprehensive volume studying contemporary Israel is an invaluable resource for students and scholars interested in Foreign and Security Policy Israel and the Middle East.
