Saud begins with a politically explosive question How is it that two days after 9 11 when U S air traffic was tightly restricted 140 Saudis many immediate kin to Osama Bin Laden were permitted to leave the country without being questioned by U S intelligence The answer lies in a hidden relationship that began in the 1970s when the oil rich House of Saud began courting American politicians in a bid for military protection influence and investment opportunity With the Bush family the Saudis hit a gusher direct access to presidents Reagan George H W Bush and George W Bush To trace the amazing weave of Saud Bush connections Unger interviewed three former directors of the CIA top Saudi and Israeli intelligence officials and more than one hundred other sources His access to major players is unparalleled and often exclusive including executives at the Carlyle Group the giant investment firm where the House of Bush and the House of Saud each has a major stake Like Bob Woodward s The Veil Unger s House of Bush House of Saud features unprecedented reportage like Michael Moore s Dude Where s My Country Unger s book offers a political counter narrative to official explanations this deeply sourced account has already been cited by Senators Hillary Rodham Clinton and Charles Schumer and sets 9 11 the two Gulf Wars and the ongoing Middle East crisis in a new context What really happened when America s most powerful political family became seduced by its Saudi counterparts Geoeconomics , **The Pandora Principle** Norbert Georg Schwarz, 2019-09-23 Growth is commonly regarded as something positive as something to be rewarded At the same time the growth of the global population and economy leads to depletion of resources violent competition and consequently to the impairment of the quality of life on earth Science has opened innumerable Pandora boxes and humankind has no option but to live with the consequences Once any item of knowledge has entered the world it is practically impossible to remove it from the world We could do away with all weapons of mass destruction but still could not remove the fundamental ability of humans to construct such weapons Progress is always accompanied by destruction Where cities grow nature must give way when a new technology arises it pushes aside older technologies and where one group of humans appropriates resources it deprives another group of humans of them The discovery of fossil fuels as energy resource around 250 years ago has allowed for tremendous growth and progress in a very short time span If the current CO2 emissions continue the atmospheric CO2 concentrations will reach concentrations that negatively affect cognitive functions within the lifetime of our children and reach lethal concentrations within a few generations Methane is a 25 times more potent greenhouse gas than CO2 and might apart from human economic activities be released in large amounts from melting permafrost areas of the earth With melting of polar ice shields global warming will accelerate as sun energy that previously was reflected through the albedo effect gets saved in the oceans With depletion of resources we think of resources to keep up our civilisation such as oil and gas However we also have to consider the depletion of resources essential for the pure survival of human beings such as water While human populations grow exponentially ground water levels shrink nearly everywhere If we are not facing near term human extinction we will at least face enormous challenges in the coming years with potential mass dying in some regions of the world most of them
