**Slim and Recovered** Ping Wang, 2010-04 As an alternative therapist with limited knowledge I actually have greater freedom and objectivity in performing my analyses since I am not bound by the restrictions of the standard theories For example since the emergence of the idea that carbohydrates and excess calories are the causes of obesity nearly all subsequent theories have involved carbo diets carbo detox or low calorie diets calorie burning and the like However my observations and practice over the past dozen years have proven that carbohydrates fats and sugar and possibly blood type affect body weight increase only when a person consumes greater than normal quantities If dietary intake

is too low less than normal thus not meeting the body's needs for cell growth these factors have little or no influence Why does the title of this book combine the words slim and recovered Simply because in over 80 percent of obesity cases the patients have other health problems as well The most common complaint is acute or chronic gastric problems others include vertigo anemia diabetes high blood pressure high cholesterol levels heart liver and kidney problems and menstrual difficulties So we can see that excess body weight is closely related to other health complaints In *Slim and Recovered* Ping Wang analyzes the problems of being overweight and disease based solely on his observations and experience in therapeutic practice He limits the illnesses discussed here to those that have been handled with satisfactory results providing greater insight The basic philosophy introduced in this book is that we should not consume more food than our digestive organs can handle so that we can avoid obesity and other health problems and we should not deceive ourselves by thinking that fruit vegetables and water will not make us fat These cases are analyzed from a perspective that is unconventional yet based on reality Discover the answers to these difficult questions Why do some people eat a lot but stay slim I consume low fat low carb low calorie food and drink and routinely exercise on the treadmill why am I still overweight Why do some vegetarians get high blood pressure and even suffer strokes Why do some people have strokes when they're still very young I regularly exercise with weights and equipment why are my arms and legs getting larger not smaller My mother drinks plenty of water why are her legs swollen and her uric acid levels so high *Slim to Win* Rosemary Conley, 2012-04-24 BE A WEIGHT LOSS WINNER Love your food but want to lose your excess weight That's easy with the help of this combined diet and cookbook created to accompany the ITV series *Slim to Win* with Rosemary Conley Diet and fitness expert Rosemary Conley shows you how to shed your unwanted pounds quickly but safely You could lose half a stone in just two weeks on her Fat Attack Fortnight Diet Or maybe you just want to find tasty new ways of sticking to a healthy eating plan Well with these *Slim to Win* recipes you won't be stuck for ideas you'll be spoilt for choice Learn how to prepare your favourite foods the low fat low Gi way and discover delicious new recipes that all the family can enjoy Whether you fancy pasta or paella a stir fry or sweet and sour dish or are looking for a decadent sounding dessert to round off a meal you'll find a great tasting solution to suit
