patterns drove an industrial economy that damaged the earth in new ways and the atomic age heightened awareness of the earth's fragility. Environmental historian Steven Stoll identifies 1945 as the birth of American environmentalism, the point when conservation and nature advocacy fused with activism to form a political movement. In this thematically organized collection of primary sources, Stoll traces the development of the environmental movement and identifies its central issues and ideologies, including the politics of preservation, population growth, biological interdependence, ecodefense, climate change, ethical consumption, and environmental justice. Stoll's insightful introduction provides students with a solid overview of environmentalism's origins and contextualizes the topics raised by the documents. Document headnotes, a chronology, questions for consideration, and a selected bibliography offer additional pedagogical support.

The Bridge at the Edge of the World James Gustave Speth, 2008-01-01 Presents an analysis of modern capitalism and its impact on the global environmental crises and discusses how the transformation of current economic and political systems can lead to environmental sustainability.

Environment Jules Pretty, 2006-06-23 This four-volume set explores the locations where the environment matters most, such as where people are poor, where environments are under threat, such as on frontiers where there are few natural resources remaining, and where industrialization is rampant. It will also explore these concerns at different system levels, from local community to regional, national, and global. It will also explore costs of damage to the very resources on which economies rely and the values of environmental goods and services and the controversies surrounding such valuations. It is organized around environment-people interactions, livelihoods, poverty, income, economic growth, environment-environment interactions, do people matter, and people-people interactions, collective action, challenges, institutions.

US Hegemony and International Organizations Rosemary Foot, S. Neil MacFarlane, Michael Mastanduno, 2003 The aims of this text are two-fold: to describe and explain US behaviour in and towards a wide range of significant global and regional institutions, and secondly to examine the impact of US behaviour on the capacity of each organization to meet its own objectives.
