Louis and Bebe Barron's Forbidden Planet James Wierzbicki, 2005-06-30 James Wierzbicki's book on the score for Forbidden Planet deals with the composers backgrounds the composers studio techniques the critical context of 1950's American science fiction films and a summary of critical readings of Forbidden Planet an analysis of the decontextualized music as presented on the 1977 original soundtrack album and a cue by cue analysis of the Barrons music as it is actually used in the film With numerous transcriptions and graphs to illustrate various aspects of musical structure this study blazes a much needed trail in the study of electronic music Louis and Bebe Barron's Forbidden Planet James

Wierzbicki, 2005-06-30 Forbidden Planet is a product of the MGM studio which at the time of the production of this film was hardly in the business of making science fiction films Originally planned as a B picture the 1956 Forbidden Planet was praised for its spectacular special effects and brilliant color cinematography The plot practically tingles with sexual innuendo and the dialogue is rich in references to Freudian psychology However in spite of all this the film was marketed to a juvenile audience Notwithstanding its uncommon look and feel perhaps the most unusual aspect of the film is the way it sounds Never before had a major Hollywood effort utilized a score generated entirely by electronic means yet seldom does one find commentary on how Louis and Bebe Barron's score again and again challenges Hollywood norms In addition to placing the composers and film in historical context James Wierzbicki's study offers a deep and thorough analysis of not only the music as used in the film but also of the decontextualized music as presented by the Barrons on the 1977 original soundtrack album The text is generously illustrated with transcriptions and graphs and can serve as a model for the examination of other extended works of electronic music for which no written score has ever existed *Revolutions in American Music: Three*

Decades That Changed a Country and Its Sounds Michael Broyles, 2024-02-20 The story of how unexpected connections between music technology and race across three tumultuous decades changed American culture How did a European social dance craze become part of an American presidential election Why did the recording industry become racially divided Where did rock n roll really come from And how do all these things continue to reverberate in today's world In *Revolutions in American Music* award winning author Michael Broyles shows the surprising ways in which three key decades the 1840s the 1920s and the 1950s shaped America's musical future Drawing connections between new styles of music like the minstrel show jazz and rock n roll and emerging technologies like the locomotive the first music recordings and the transistor radio Broyles argues that these decades fundamentally remade our cultural landscape in enduring ways At the same time these connections revealed racial fault lines running through the business of music in an echo of American society as a whole Through the music of each decade we come to see anew the social cultural and political fabric of the time Broyles combines broad historical perspective with an eye for the telling detail and presents a variety of characters to serve as focal points including the original Jim Crow a colorful Hungarian dancing master named Gabriel de Korponay Empress of the Blues

A short history of electronic music Johann Merrich, 2021-07-20T00:00:00+02:00 The majority of books covering the birth and development of electroacoustic and electronic music do seem to only give us a partial overview of this peculiar aspect of contemporary cultural production essays and monographs provide an androcentric view on the subject rarely mentioning the contribution of inventresses female composers and theorists The young age of electronic music together with the traditional privilege granted by historians to the productions of North America and some European countries contribute in obstructing the drafting of a paritary diagonal and comprehensive view of this topic This book aims to open a new perspective on electronic music history If we want to write a new more inclusive and equitable future we will have to look at the facts by training a curious gaze stripped of mechanically reiterated certainties From the birth of the Theremin to the first commercial software intended for the production of computer music from Japan to Russia passing through Europe and the American Continent each chapter of this book deals with a specific moment of the history of electronic music narrated through the compositions and experiences of women composers Addressed to lovers of electronic music scholars and non experts *A Short History of Electronic Music and its Women Protagonists* discloses a new and vibrating universe of untold stories

Sound Design is the New Score Danijela Kulezic-Wilson, 2020 The practice of blurring the line between score and sound design has transformed contemporary film soundscape by challenging not only the long established hierarchical relationships between dialogue

music and sound effects but also the modes of perception shaped by classical soundtrack practices The methods of this new trend rely on the language of contemporary popular and art music producing soundtracks in which it is difficult to tell the difference between score and ambient sound where pieces of electroacoustic music are merged with diegetic sound sound effects are absorbed into the score or treated as music and diegetic sound is treated as musique concrète In *Sound Design* is the New Score Kulezic Wilson explores theoretical aesthetic and sensuous dimensions of this new trend providing a multifaceted portrait of a practice which recognizes the interconnectedness of all soundtrack elements and emphasizes their inherent musicality The aesthetic concerns of this practice are illuminated through the concept of the aesthetics of reticence which rejects classical narrative and scoring conventions and uses integrated soundtrack strategies to create the space for mystery in art and for individuality in the cinematic experience The book's emphasis on sensuous and musical aspects of this practice informed by the feminist discourse on the erotics of art challenges popular notions about sensory cinema demonstrating that the sensuousness of film form and its soundscapes is more sophisticated than simply being the result of excessive sensory stimulation facilitated by the use of digital technology or the intensified aesthetics it inspires The discussion is supported by a wide range of case studies from American Independent Asian Australian and European cinemas including films by Shane Carruth Claire Denis Hou Hsiao Hsien Harmony Korine David Michôd Gus Van Sant and Peter Strickland
