

THE HOUSES OF LOUIS KAHN

Louis I Kahn Houses

George H. Marcus, William Whitaker

Louis I Kahn Houses:

The Houses of Louis Kahn George H. Marcus, William Whitaker, 2013 A stunning celebration of the architect's residential masterpieces Louis Kahn 1901-1974 one of the most important architects of the postwar period is widely admired for his great monumental works including the Kimbell Art Museum the Salk Institute and the National Assembly Complex in Bangladesh However the importance of his houses has been largely overlooked This beautiful book is the first to look at Kahn's nine major private houses Beginning with his earliest encounters with Modernism in the late 1920s and continuing through his iconic work of the 1960s and 1970s the authors trace the evolution of the architect's thinking which began and matured through his design of houses and their interiors a process inspired by his interactions with clients and his admiration for vernacular building traditions Richly illustrated with new and period photographs and original drawings as well as previously unpublished materials from personal interviews archives and Kahn's own writings The Houses of Louis Kahn shows how his ideas about domestic spaces challenged conventions much like his major public commissions and were developed into one of the most remarkable expressions of the American house

Feature: Houses by Louis I. Kahn Louis I. Kahn, Nobuyuki Yoshida, 2009 建築の神々 Yutaka Saito, 2003-10 建築の神々 Louis I. Kahn, Peter S. Reed, 1996 *Houses by Louis I. Kahn*, 2009 **A+u 09:02, 461** A+U Publishing, 2019-10-31 Louis I Kahn's 12 most recognized houses are included in this issue from his first the Oser House in 1940 to the last built work in his lifetime the Korman House in 1973 Each project has been newly photographed and illustrates the current state of the homes This edition is notable for the number of rare interior views that show furnishings and layout inside the residences Also included are a series of drawings recently found in the basement of the Fisher House that document the design process through 5 different schemes to the final design Designing houses was a constant in the career of Louis I Kahn Even now his houses are still loved and lived in We had the opportunity to photograph 12 residences by Kahn and this issue illustrates the current state of these homes From his first house designed before World War II to the house completed as the last work during his lifetime these projects are presented through images published for the first time and original drawings Also included are a series of drawings that were recently found in the basement of the Fisher House that document the design process over 5 different schemes to the final design A transcription of a conversation with Mrs Fisher describes his views on housing and architecture This edition is notable for the number of rare interior views that show furnishings and inside of the homes Text in English and Japanese Louis I. Buildings and projects, 1962-1965 Louis I. Kahn, 1987 **Louis I. Kahn** Klaus-Peter Gast, Louis I. Kahn, 1999 1999 is the twenty fifth anniversary of Louis Kahn's death In the second half of the twentieth century Louis Kahn's designs took on enormous significance for international architecture Kahn belonged to that generation of architects which perfected and simultaneously surpassed Modernism Most of Kahn's projects were realised in the USA and several large projects were built in Asia From Kahn's early work to larger projects such as the National Capital of Bangladesh in Dhaka and the Kimbell Art Museum in Fort Worth the documented works all illustrate the human aspect in Kahn's work **Louis I. Kahn** Vincent Scully (Jr.), 1962 Over 100 illustrations plans drawings and photographs together with a selection from the writings of the architect complete bibliography and chronology **Key Houses of the Twentieth Century** Colin Davies, 2006 Featuring over 100 of the most significant and influential houses of the twentieth century For each of the houses included there are numerous accurate scale plans showing each floor together with elevations sections and site plans where appropriate All of these have been specially drawn for this book and are based on the most up to date information and sources **Notes on the Architecture of Louis I. Kahn**, 2015 **Louis I. Kahn, Escherick House** Louis I. Kahn, 2008 Louis Kahn in the Midwest Jack Perry Brown, 1989 **Plans, Sections and Elevations** Richard Weston, 2004 CD ROM contains files for all of the plans sections and elevations included in the book **The Greenwood Encyclopedia of Homes through World History** James M. Steele, 2009-03-30 The house throughout history in every place in the world has been built to provide shelter from the elements The dwellings that have resulted are as different as the people that have built them the social norms that prevailed at the time and place in which they were built and the natural environment that they adapted to Studying them now in a comprehensive way allows us to understand the social political economic and religious conditions that existed for their inhabitants They are a three dimensional record of culture Twenty four pages of color images along with black and white images through three volumes illustrate the homes of people throughout the world The volumes cover ancient times to the late Middle Ages the Renaissance to the Industrial Revolution and the Post Industrial Revolution to the Present **Houses by Louis I. Kahn**, 2009 Twenty-Five Buildings Every Architect Should Understand Simon Unwin, 2014-11-17 Twenty Five Buildings Every Architect Should Understand is an essential companion to Simon Unwin's *Analysing Architecture* and part of the trilogy which also includes his *Exercises in Architecture* Learning to Think as an Architect Together the three books offer an introduction to the workings of architecture providing for the three aspects of learning theory examples and practice Twenty Five Buildings focusses on analysing examples using the methodology offered by *Analysing Architecture* which operates primarily through the medium of drawing In this second edition five further buildings have been added to the original twenty from an even wider geographical area which now includes the USA France Italy Mexico Switzerland Spain Finland Germany Australia Norway Sweden India and Japan The underlying theme of *Twenty Five Buildings Every Architect Should Understand* is the relationship of architecture to the human being how it frames our

lives and orchestrates our experiences how it can help us make sense of the world and contribute to our senses of identity and place Exploring these dimensions through a wide range of case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading for every architect *Trajectories in Architecture* Michael Jasper,2023-04-21 *Trajectories in Architecture* Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date *Trajectories in Architecture* adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture s recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture s traditions and design principles and their future expression *Trajectories in Architecture* includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei *A House in the Sun* Daniel A. Barber,2016-10-13 *A House in the Sun* describes a number of experiments in solar house heating in American architectural engineering political economic and corporate contexts from the beginning of World War II until the late 1950s Houses were built across the Midwest Northeast and Southwestern United States and also proposed for sites in India South Africa and Morocco These experiments developed in parallel to transformations in the discussion of modern architecture relying on new materials and design ideas for both energy efficiency and claims to cultural relevance Architects were among the myriad cultural and scientific actors to see the solar house as an important designed element of the American future These experiments also developed as part of a wider analysis of the globe as an interconnected geophysical system Perceived resource limitations in the immediate postwar period led to new understandings of the relationship between energy technology and economy The solar house both as a charged object in the milieu of suburban expansion and as a means to raise the standard of living in developing economies became an important site for social technological and design experimentation This led to new forms of expertise in architecture and other professions Daniel Barber argues that this mid century interest in solar energy was one of the first episodes in which resource limitations were seen as an opportunity for design to attain new relevance for potential social and cultural transformations Furthermore the solar discussion established both an intellectual framework and a funding structure for the articulation of and response to global environmental concerns in subsequent decades In presenting evidence of resource tensions at the beginning of the Cold War the book offers a new perspective on the histories of architecture technology and environmentalism one more fully entangled with the often

competing dynamics of geopolitical and geophysical pressures
