Understanding Military Doctrine Harald Hoiback, 2013-07-18 This book puts military doctrine into a wider perspective drawing on military history philosophy and political science Military doctrines are institutional beliefs about what works in war given the trauma of 9 11 and the ensuing War on Terror serious divergences over what the message of the new military doctrine ought to be were expected around the world However such questions are often drowned in ferocious meta doctrinal disagreements What is a doctrine after all This book provides a theoretical understanding of such questions Divided into three parts the author investigates the historical roots of military doctrine and explores its growth and expansion until the present day and goes on to analyse the main characteristics of a military doctrine Using a multidisciplinary approach the book concludes that doctrine can be utilized in three key ways as a tool of command as a tool of change and as a tool of education This book will be of much interest to students of military studies civil military relations strategic studies and war studies as well as to students in professional military education

Military Strategy as Public Discourse Tadd Sholtis, 2013-12-04 This book presents the current history of United States military strategy in Afghanistan as an example of dysfunctional policy discourse among the nation's elites The legitimacy of a country's military strategy can become a subject of intense public debate and doubt especially in prolonged conflicts Arguments typically hinge on disagreements about the values at stake the consequences of action or inaction and the authority of those responsible for the plan As the US entered its second decade at war in Afghanistan political and military leaders struggled to explain the ends and means of their strategy through internal policy debates the promotion of counterinsurgency doctrine and day to day accounts of the war's progress Military Strategy as Public Discourse considers

recent US strategy in Afghanistan as a form of valid and equitable public discussion among those with the ability to affect outcomes The work examines the dominant forms of discourse used by the various groups of elites who make and execute strategy and considers how representations of these forms of discourse in news media shapes elite understanding of the purpose of US efforts in wars of choice The book proposes how policy makers should address the problems of public discourse on war which tends to exclude or marginalize relevant elites and focus on narrow questions of validity This book will be of much interest to students of strategic studies US foreign policy and security studies in general

Complex Peace Operations and Civil-Military Relations Robert Egnell, 2009-05-13 This book explores the impact of different civil military structures on operational effectiveness in complex peace operations Recent operations in Iraq Afghanistan and Somalia are examples of grand failures to enforce peace and to promote democracy and development through international interventions A missing variable in analyses of these conflicts hitherto has been the nature of the civil military interface and its impact The principal argument of this book is that the civil military interface should ideally be integrated within the interagency arena as well as within the defence ministry Such integration has the potential to provide joint civil military planning and comprehensive approaches to operations It also creates mutual trust and understanding amongst officers and civil servants from different departments agencies and units and thereby a co operative interagency culture For the civil military interface to function effectively within the chain of command during operations a co operative culture of trust is essential Crucially structurally and culturally integrated civil military structures are likely to provide a more balanced view of the functional imperative of the armed forces The results are armed forces fit for whatever purpose the political leadership decides for them including complex peace support operations Empirically the book applies the theoretical framework to a comparative study of US and British patterns of civil military relations their strategic cultures and their operations in Iraq This book will be of much interest to students of peace operations civil military relations humanitarian intervention and security studies IR in general Robert Egnell is a lecturer in War Studies at the Swedish National Defence College and a senior researcher at the Swedish Defence Research Agency He was awarded the 2008 Kenneth N Waltz Dissertation Prize for the best thesis in the field of international security

The Allure of Battle Cathal J. Nolan, 2017 Stretching from Antiquity to the Second World War a major new work of history that examines how battles have been fought and reveals how wars have actually been won

Military Cooperation in Multinational Peace Operations Joseph Soeters, Philippe Manigart, 2009-12-04 This edited volume uses theoretical overviews and empirical case studies to explore both how soldiers cope with the new forms of cultural diversity occurring within various multinational military operations and how their organizations manage them

Military organizations like other complex organizations are now operating in an ever more diverse environment with the missions themselves being ever more varied and mostly conducted in a multinational framework. Members of the military have to deal with a host of international actors in the theatre of operations and do so in a foreign cultural environment often in countries devastated by war. Such conditions demand a high level of intercultural competence. It is therefore crucial for military organizations to understand how military personnel manage this cultural diversity. This book will be of much interest to students of peace operations, military studies, international security as well as sociology and business studies.

Military Industry and Regional Defense Policy Timothy D. Hoyt, 2017-07-05. Military Industry and Regional Defense Policy re-examines military industrialization in the developing world, focusing on policy making in producer states and the impact of security perceptions on such policy making. Timothy D. Hoyt reassesses the role of regional state sub-systems in international relations and recent historical studies of international technology and arms transfers. Looking at Israel, Iraq, and India, the three most powerful regional powers in the Cold War era, he presents an expert analysis of the three-sided phenomena of the regional hegemony, the regional competitor, and the small over-achiever. This new book breaks away from existing literature on military industries in the developing world, which has focused on their economic and development costs and benefits. These past studies have used primitive methodologies that focus on the production of complete weapons systems, a misleading gauge in a world of growing international defense cooperation. They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict and of the defence planning and concerns that drove development of indigenous military industries in key regional powers. This new text delivers an incisive new perspective.

Military Innovation in Small States Michael Raska, 2015-11-06. This book provides a comprehensive assessment of the global diffusion of the Revolution in Military Affairs (RMA) and its impact on military innovation trajectories in small states. Although the Revolution in Military Affairs (RMA) concept has enjoyed significant academic attention, the varying paths and patterns of military innovation in divergent strategic settings have been overlooked. This book seeks to rectify this gap by addressing the broad puzzle of how the global diffusion of RMA-oriented military innovation, the process of international transmission, communication, and interaction of RMA-related military concepts, organizations, and technologies, has shaped the paths, patterns, and scope of military innovation of selected small states. In a reverse mode, how have selected small states influenced the conceptualization and transmission of the RMA theory, processes, and debate? Using Israel, Singapore, and South Korea as case studies, this book argues that RMA-oriented military innovation paths in small states indicate a predominantly evolutionary trajectory, albeit with a varying pattern resulting from the

confluence of three sets of variables 1 the level of strategic organizational and operational adaptability in responding to shifts in the geostrategic and regional security environment 2 the ability to identify anticipate exploit and sustain niche military innovation select conceptual organizational and technological innovation intended to enhance the military's ability to prepare for fight and win wars and 3 strategic culture While the book represents relevant empirical cases for testing the validity of the RMA diffusion hypotheses from a policy oriented perspective this book argues that these case studies offer lessons learned in coping with the security and defence management challenges posed by military innovation in general This book will be of much interest for students of military innovation strategic studies defence studies Asian politics Middle Eastern politics and security studies in general
