Stratigraphic Evolution of Foreland Basins Steven L. Dorobek, Gerald M. Ross, 1995 A strong case can be made that
foreland basins are where the casual links between sedimentation and tectonic events were first recognized as evidenced by
the interpretations of geologists working in classic foreland areas This Special Publication was derived from a Research
Symposium entitled Stratigraphic Sequences in Foreland Basins held at the AAPG SEPM joint annual meeting on June 1992
in Calgary Alberta Canada This volume provides a well balanced perspective of current research on foreland basin
stratigraphy and also serves as another element in the evolving framework that comprises our understanding of foreland
basins Given that so many of earth s resources are found in foreland basins and that foreland basin strata often provide the
only preserved record of the tectonic events that led to basin development the impetus for continued studies of foreland
basin strata should remain for many generations of geologists to come *Metamorphism and Tectonics of Eastern and*
