Models In The Policy Process Public Decision Making In The Computer Era:

Models in the Policy Process Martin Greenberger, Matthew A. Crenson, Brian L. Crissey, 1976 Agricultural Economics Research, 1981 *Systems Analysis in Urban Policy-Making and Planning* Bruce Hutchinson, Michael Batty, 2012-12-06 In September 1980 the Special Programme Panel on Systems Sciences of the North Atlantic Treaty Organization NATO sponsored an Advanced Research Institute ARI on Systems Analysis in Urban Policy Making and Planning which was held at New College University of Oxford from 21st to 27th September This week long meeting brought together 35 invited delegates from most countries of the NATO Alliance to discuss the impact which systems analysis has had and is likely to have on urban affairs The manuscript was submitted to the publisher in June of 1982 Although the goal of the ARI was to assess the impact of urban systems analysis as seen through the eyes of those closely involved in such work the meeting also addressed opportunities for future research and development and therefore in this book we have attempted to synthesize discussions at the meeting with this in mind But before we describe the structure of this book it is worth recounting in a little more detail the intentions and organization of the meeting for this has had an important effect on the type of papers produced here the way they have been written and the issues they address *The Feasibility of Citizen's Income* Malcolm Torry, 2016-06-07 This book is the first full length treatment of the desirability and feasibility of implementing a citizen's income also known as a basic income It tests for two different kinds of financial feasibility as well as for psychological behavioral administrative and political viability and then assesses how a citizen's income might find its way through the policy process from proposal to implementation Drawing on a wide variety of sources of evidence from around the world this new book from the director of the Citizen's Income Trust UK provides an essential foundation for policy and implementation debates Governments think tanks economists and public servants will find this thorough encompassing book indispensable to their consideration of the economic and social advantages and practicalities of a basic income **Theory and Practice in Policy Analysis** M. Granger Morgan, 2017-10-12 Many books instruct readers on how to use the tools of policy analysis This book is different Its primary focus is on helping readers to look critically at the strengths limitations and the underlying assumptions analysts make when they use standard tools or problem framings Using examples many of which involve issues in science and technology the book exposes readers to some of the critical issues of taste professional responsibility ethics and values that are associated with policy analysis and research Topics covered include policy problems formulated in terms of utility maximization such as benefit cost decision and multi attribute analysis issues in the valuation of intangibles uncertainty in policy analysis selected topics in risk analysis and communication limitations and alternatives to the paradigm of utility maximization issues in behavioral decision theory issues related to organizations and multiple agents and selected topics in policy advice and policy analysis for government *Public Administration in an Information Age* I.Th.M. Snellen, W.B.H.J. van de Donk, 1998-12-31 This book is a joint effort of researchers who have been involved in research

projects and programmes that have been trying to chart and reflect upon the implications of Information and Communication Technologies ICTs for Public Administration Since the 1950s computers had largely facilitated and the transformation of the minimal Night Watch state into the modern Welfare state through their contribution to their effectivity productivity and efficiency In most Handbooks of Public Administration computers are seen as neutral instruments and most of the time the role of computer technologies in the transformation of public administration is completely neglected This deafening silence is a great contrast with the way ICT s are actually changing public administration The faster the developments in a field of study are the more difficult it is to let the theories related to that field of study mature In such circumstances most statements will remain provisional and context dependent 25 years of research in Irvine California and Kassel Germany and more than 10 years of research in Tilburg Rotterdam The Netherlands and about seven years of research in Glasgow Nottingham the United Kingdom nonetheless enables the presentation of a modest image of public administration as it is entering the information age Researchers in each of these groups have nevertheless not stopped trying to phrase theories about the implications of informatization for public administration with a more or less large scope that are robust in different contexts and over longer periods of time These results and theories covering a broad set of elements of the body of knowledge of public administration are presented in this volume As the authors try to demonstrate in this book informatization developments in public administration do not only challenge the existing body of knowledge of the public administration discipline but they are also opening up new perspectives and paradigms for the study of public administration

A Systems-Based Approach to Policymaking Kenyon B. de Greene, 2012-12-06 This book is based on a number of systems concepts of which the following are emphasized here oThe interacting systems of society and the environment are dynamic and evolutionary oEvolution of these systems carries them through stages of differential stability and instability continuity and discontinuity oAssociated with evolution and instability is structural change that is essentially irreversible oThe present is a stage of world transformation that may not have been equaled for decades or even centuries oPolicies and decisions must match the times in the present case the stage of world transformation The time 11 59 59 PM approximately on December 31 2000 has an important symbolic meaning It marks the end of a minute the end of an hour the end of a day the end of a year the end of a decade the end of a century and the end of a millennium The time and date provide a convenient yardstick against which we can evaluate the evolution of our thinking and the adequacy of our assumptions mental models paradigms and policies Will the beginning turn out to be appropriately different from the end We hope that this book is helpful in such evaluation This is a new paradigm book which both presents and advances the new way of thinking about the systems of science technology society economics politics and the environment and actively calls for the replacement of the worn out cognitive sociotechnical paradigm **Advances in Energy Systems and Technology** Peter Auer, 2013-10-22 Advances in Energy Systems and Technology Volume 2 is intended to furnish a detailed and critical review of timely topics within the

general field of energy The breadth of coverage is greater than that generally found in journal review articles Thus the collection of chapters contained within this serial will serve as a valuable reference work for an extended period of time The book contains four chapters and opens with a discussion of the development of solar power satellites This is followed by separate chapters on sea thermal power the direct use of solar energy and the rationale structure and use of models for energy technology assessment This volume aims to continue attracting a wide audience consisting of professional workers in the field serious students at the graduate or advanced undergraduate level as well as those policy analysts and energy planners who seek a more complete understanding of technical matters
