many highly intriguing results New high performance products are appearing one after another and it would seem we have only scratched the surface of the hidden possibilities of these fascinating materials Dr Alex Goldman is well qualified to talk about the state of the art in ferrites For many years Dr Goldman has been heavily involved in the field as director of the research and development division of Spang Co and other enterprises This book Modern Ferrite Technology based in part on his own experiences presents a valuable overview of the field It is testimony to his commitment and bountiful knowledge about one of today's most intriguing areas of technology
