Achieving sustainable production of poultry meat Volume 1 Steven C. Ricke, 2017-01-01 To meet growing demand the FAO has estimated that world poultry production needs to grow by 2.3% per year to 2030. Much of the increase in output already achieved has been as a result of improvements in commercial breeds combined with rearing in more intensive production systems. However, more intensive systems and complex supply chains have increased the risk of rapid transmission of animal diseases and zoonoses. Consumer expectations of sensory and nutritional quality have never been higher. At the same time, consumers are more concerned about the environmental impact of poultry production as well as animal welfare. Drawing on an international range of expertise, this book reviews research on safety, quality, and sustainability issues in poultry production. Part 1 discusses risks from pathogens, detection, and safety management on farms and in slaughterhouse operations. Part 2 looks at ways of enhancing the flavour, colour, texture, and nutritional quality of poultry meat. Finally, the book reviews the environmental impact of poultry production. Achieving sustainable production of poultry meat Volume 1 Safety, quality, and sustainability will be a standard reference for poultry and food scientists in universities, government, and other research centres and companies involved in poultry production. It is accompanied by two further volumes which review poultry breeding, nutrition, health, and welfare. Tunisia Ajit Ghose, Vali Jamal, Samir Radwan, 2005-10-18 After two decades of spectacular growth, the Tunisian economy is in crisis. The authors identify the reasons for this and look closely at the transformation of the economy, assessing its implications, particularly for the labour market and the distribution of income and welfare. **The Digital Age in Agriculture** Mehmet Ozguven, 2023-02-23 The Digital Age in Agriculture presents information related to the digital age in the agriculture sector.
