Pastoralism and Common Pool Resources Sandagsuren Undargaa, 2016-03-31 The grazing of animals on common land and associated property rights were the original basis of the concept of the tragedy of the commons Drawing on the classic work of Elinor Ostrom and the readings of political ecology this book questions the application of exclusive property rights to mobile pastoralism and rangeland resource governance It argues that this approach inadequately represents property relations in the context of Mongolian pastoralism The author presents an in depth exploration and analysis of mobile pastoral production and resource management in Mongolia The country is widely considered to be a prime example of successful and resilient common pool resource management but now faces a dilemma as policy advocates attempt to adjust historical pastoralism to a modern property regime framework The book strengthens understanding of the complex and multilateral considerations involved in natural resource governance and management in a mobile pastoralist context It considers the implications for common pool resource management and pastoral societies in Africa Russia and China and includes recommendations for formulating national policy

China's Foreign Relations and the Survival of Autocracies Julia Bader, 2014-10-30 The Chinese government has frequently been criticized for propping up anti democratic governments This book investigates the rise of China as an emerging authoritarian power By comparing China's bilateral relations to three Asian developing countries Burma Cambodia and Mongolia it examines how China targets specific groups of actors in autocracies versus non autocracies It illustrates how the Chinese non interference policy translates into support for incumbent leaders in autocratic countries and how the Chinese government has thereby profited from exploiting secretive decision making in autocracies to realize its own external interests such as achieving access to natural resources In a statistical analysis of the patterns of Chinese external cooperation and their impact on the survival of autocratic leaders the book finds some evidence that China is more likely to target autocracies with economic cooperation However only some forms of bilateral interaction are found to increase the prospect of survival for autocratic leaders This important contribution to the understanding of both external factors of authoritarian endurance and China's foreign relations a field of study still lacking systematic investigation will be of great interest to students and researchers in Development Studies Asian Studies International Relations and International Political Economy

Sabloff, 2016-06-16 Do all people desire democracy For at least a century the idea that democracy is a universal good has been an article of faith for American policy makers Paula Sabloff challenges this conventional wisdom about who wants democracy and why Arguing that certain universal human aspirations exist she shows how local realities are highly particularistic and explains that culture history and values are critical to the study of political systems Her fascinating study of Mongolia feudal until it became the first country to follow Russia into communism and now struggling with post socialist democratization is a model for investigating how everyday people around

the world actually think about and implement democracy on their own terms
