Modern Obstetrics In General Practice:

Modern Obstetrics in General Practice Geoffrey Norman Marsh, 1985 There is increasing dissatisfaction among both specialists and patients with hospital based antenatal care and a recurrent finding in lay comments about obstetric care has been satisfaction with general practice and midwife involvement General practitioners themselves are beginning to realize that the antenatal and postnatal period of a woman's life is very central to their role as family doctors Two recent reports in the UK have concluded that specialist antenatal and postnatal care should on the whole be concentrated on high risk patients and that the vast majority of care could and should be done by community based primary health care teams Thus all general practitioners need to update and reassess their antenatal puerperial and postnatal care Both reports recommended greater use of existing general practice delivery facilities and that all specialist units should provide facilities for general practitioners to look after their own patients in labour The general practitioner emphasis must be on normalizing obstetrics where possible and most importantly responding to the woman's requests and suggestions This book will fire the enthusiasm of all GPs with an interest in obstetrics There are contributions from many disciplines including GPs specialists health visitors and midwives

Women and Modern Medicine, 2016-10-11 Modernising scientific medicine emerged in the nineteenth century as an increasingly powerful agent of change in a context of complex social developments Women's lives and expectations in particular underwent a transformation in the years after 1870 as education employment opportunities and political involvement extended their personal and gender horizons For women medicine came to offer not just treatment in the event of illness but the possibilities of participation in medical practise of shaping social policies and political understandings and of altering the biological imperatives of their bodies The essays in this collection explore various ways in which women responded to these challenges and opportunities and sought to use the power of modernising Western medicine to further their individual and gender interests
