Modern Architecture and the Critical Present Kenneth Frampton. 1982 **Modern Architecture of Quito** Christian Parreno, 2024-08-22 Situated at the crossroads of the foreign and the vernacular Quito the capital of Ecuador with its world famous yet understudied built environment stands as a testament to architectural in betweenness This book interweaves history and theory to explore how near and far influences have shaped its unique character Case studies present diverse and unexpected episodes in the architectural history of this city spanning the intricacies of its topography the design of modernist houses and the appropriation of the motel typology Together they show how fluxes of different origins have created an architecture marked by diversity and interrelation To theoretically frame these investigations this anthology readdresses the notions of the global and the local examining their tension and unavoidable coexistence while introducing the in between as a phenomenon with many variations and embodiments increasingly referenced in architectural thinking This book not only furthers the evolution of these concepts but also demonstrates their value as tools for analyzing the architectures of Latin America and the Global South more broadly With contributions from both international experts and a new generation of Ecuadorian scholars Modern Architecture of Quito is an indispensable resource for students and researchers investigating the development of architectural modernism in Latin America Reading Kenneth Frampton Gevork Hartoonian, 2022-05-10 This book focuses on the first edition of Kenneth Frampton's Modern Architecture A Critical History published in 1980 It searches for clues and positions that will provide the reader with an unprecedented insight into the significance of Frampton s historiography of modern architecture It explores selected themes in line with Frampton s many faceted contribution certain aspects of which can be noted between the lines of his ongoing criticism of the present day architecture which inevitably lead us to a critical understanding of the past the modernity of architecture's contemporaneity. The compiled chapters attempt to open a window onto the constellation of themes that allowed Frampton to hold on to his anteroom view of history even amidst the flow of time and flood of temporalities spanning 1980 2020 The book elucidates how Frampton s critical presentation of the history of modern movement architecture and the book s classificatory mode periodization contribute to our understanding of the contemporaneity of architecture today **Global Perspectives on Critical Architecture** Gevork Hartoonian, 2016-03-03 Judging from the debates taking place in both education and practice it appears that architecture is deeply in crisis New design and production techniques together with the globalization of capital and even skilled labour have reduced architecture to a commodified object its aesthetic qualities tapping into the current pervasive desire for the spectacular These developments have changed the architect's role in the design and production processes of architecture Moreover critical architectural theories including those of Breton Heidegger and Benjamin which explored the concepts of technology modernism labour and capital and how technology informed the cultural along with later theories from the 1960s which focused more on the architect's theorization of his her own design strategies seem

increasingly irrelevant In an age of digital reproduction and commodification these theoretical approaches need to be reassessed Bringing together essays and interviews from leading scholars such as Kenneth Frampton Peggy Deamer Bernard Tschumi Donald Kunze and Marco Biraghi this volume investigates and critically addresses various dimensions of the present crisis of architecture It poses questions such as Is architecture a conservative cultural product servicing a given producer consumer system Should architecture s affiliative ties with capitalism be subjected to a measure of criticism that can be expanded to the entirety of the cultural realm Is architecture s infusion into the cultural the reason for the visibility of architecture today What room does the city leave for architecture beyond the present delirium of spectacle Should the thematic of various New Left criticisms of capitalism be taken as the premise of architectural criticism Or alternatively putting the notion of criticality aside is it enough to confine criticism to the production of insightful and pleasurable texts

Architecture and the Public World Kenneth Frampton, 2024-01-25 This book brings together Kenneth Frampton s essays from the 1960s to today which epitomize his reflections on the historical theoretical entanglements of architecture with place the public realm cultural identity urban landscape and environment and the political question of the predicament of architecture in the new Millennium The essays explore Frampton's contention that architecture s imperative is to assume a significant responsibility for the edification and stewardship of the Arendtian public world One of the most theoretically sophisticated and politically committed architectural thinkers Frampton s work breaks emphatically with the limits and norms of much contemporary practice and restores a sense of richness and social consequence of architecture s unfinished project while offering abiding lessons not only for architecture but for social cultural and design criticism alike Modern Architecture Irene Cheng, Charles L Davis, Mabel O Wilson, 2020-05-26 Although race a concept of human difference that establishes hierarchies of power and domination has played a critical role in the development of modern architectural discourse and practice since the Enlightenment its influence on the discipline remains largely underexplored This volume offers a welcome and long awaited intervention for the field by shining a spotlight on constructions of race and their impact on architecture and theory in Europe and North America and across various global contexts since the eighteenth century Challenging us to write race back into architectural history contributors confront how racial thinking has intimately shaped some of the key concepts of modern architecture and culture over time including freedom revolution character national and indigenous style progress hybridity climate representation and radicalism By analyzing how architecture has intersected with histories of slavery colonialism and inequality from eighteenth century neoclassical governmental buildings to present day housing projects for immigrants Race and Modern Architecture challenges complicates and revises the standard association of modern architecture with a universal project of emancipation and progress A Critical History of Contemporary Architecture Elie G. Haddad, David Rifkind, 2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi

and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects

Engineering Architecture Yasmin Sabina Khan, 2004 The structural engineer responsible for Chicago's John Hancock Center and Sears Tower Fazlur R Khan 1929 1982 pioneered structural systems for high rise design that broadened the palette of building forms and expressions available to design professionals today **Heidegger in America** Martin Woessner, 2010-12-20 Heidegger in America explores the surprising legacy of his life and thought in the United States of America As a critic of modern life Heidegger often lamented the growing global influence of all things American However it was precisely in America where his thought inspired the work of generations of thinkers not only philosophers but also theologians architects novelists and even pundits As a result the reception and dissemination of Heidegger's philosophical writings transformed the intellectual and cultural history of the United States at a time when American influence was itself transforming the world A case study in the complex and sometimes contradictory process of transnational exchange Heidegger in America recasts the scope and methods of contemporary intellectual and cultural history in the age of globalization challenging what we think we know about Heidegger and American ideas simultaneously Architectural Historiography Dana Arnold, Elvan Altan Ergut, Belgin Turan Ozkaya, 2006-09-27 Rather than subscribing to a single position this collection informs the reader about the current state of the discipline looking at changes across the broad field of methodological theoretical and geographical plurality Divided into three sections Rethinking Architectural Historiography begins by renegotiating foundational and contemporary boundaries of architectural history in relation to other fields such as art history and archaeology It then goes on to critically engage with past and present histories disclosing assumptions biases and absences in architectural historiography It concludes by exploring the possibilities provided by new perspectives reframing the discipline in the light of new parameters and problematics. This timely and illustrated title reflects upon the current changes in historiographical practice exploring potential openings that may contribute further transformation of the disciplines and theories on architectural historiography and addresses the current question of the disciplinary particularity of architectural history **The Space of Appearance** George Baird, 1995 George Baird probes into the conceptual lineage and current expressions of postmodernism and the critique of postmodern architecture over the past four decades Resisting Postmodern Architecture Stylianos Giamarelos, 2022-01-10 Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception The 1990s increased its pertinence as an architectural

theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation Today its main principles such as acknowledging the climate history materials culture and topography of a specific place are integrated in architects education across the globe But at the same time the richer cross cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local Retrieving both the globalising branches and the overlooked cross cultural roots of critical regionalism Resisting Postmodern Architecture resituates critical regionalism within the wider framework of debates around postmodern architecture the diverse contexts from which it emerged and the cultural media complex that conditioned its reception In so doing it explores the intersection of three areas of growing historical and theoretical interest postmodernism critical regionalism and globalisation Based on more than 50 interviews and previously unpublished archival material from six countries the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice Stylianos Giamarelos challenges long held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory history and historiography The Oxford Dictionary of Architecture James Stevens Curl, Susan Wilson, 2015-02-26 Containing over 6 000 entries from Aalto to Zwinger and written in a clear and concise style this authoritative dictionary covers architectural history in detail from ancient times to the present day It also includes concise biographies of hundreds of architects from history excluding living persons from Sir Francis Bacon and Imhotep to Liang Ssu ch eng and Francis Inigo Thomas The text is complemented by over 260 beautiful and meticulous line drawings labelled cross sections and diagrams These include precise drawings of typical building features making it easy for readers to identify particular period styles This third edition of The Oxford Dictionary of Architecture has been extensively revised and expanded with over 900 new entries including hundreds of definitions of garden and landscape terms such as Baroque garden floral clock hortus conclusus and Zen garden design Each entry is followed by a mini bibliography with suggestions for further reading The full bibliography to the first edition previously only available online has also been fully updated and expanded and incorporated into this new edition This is an essential work of reference for anyone with an interest in architectural and garden history With clear descriptions providing in depth analysis it is invaluable for students professional architects art historians and anyone interested in architecture and garden design and provides a fascinating wealth of information for the general reader Modern Architecture: A Critical History (Fifth) (World of Art) Kenneth Frampton, 2020-09-08 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of
