

THE MODERN DOWSER

A PRACTICAL GUIDE TO DIVINING

BY

LE VICOMTE

HENRY DE FRANCE

This book represents the fruits of recent scientific investigation of the phenomena of dowsing, showing the extraordinary progress that has been made in the development of the art and in our knowledge of its working.

The use of the divining rod and pendulum may now be applied to biology for the location of disease in plants and animals as well as for the discovery of ores, oil and water.

The dowser need not be a specially gifted person and anyone, who cares to, can attain, with the aid of this book, to a mastery of its principles and an ability to make practical use of them.
