Non-Finite Relativization. A Typological Study in Accessibility. Ladislav Drozdík, 2010 The monograph is dealing with the non finite relativization formally marked by the absence of dependent clauses The traditional grammar tends to classify these constructions in terms of sentences with multiple attribute In a number of languages however such constructions represent the unique way to express relativity Turkic languages Korean Japanese among others The primary aim of the study is to establish the relation between subject and non subject non finite relatives in database languages Arabic Hungarian Turkish and Korean In contrast to Indo European languages like English German and Russian where the non finite relativization is reduced to subject that of all database languages involves non subject as well This monograph explores the structural parameters controlling the relation between subject and non subject

relatives mainly the type of relativizer and word order which may considerably vary
