An abstract graphic featuring a large, glowing yellow-orange sphere on the left, partially obscured by a series of blue and white light rays that curve around it. To the right, a cluster of thin, white lines radiates from a point, resembling a lens or a source of light. The background is dark blue with swirling, ethereal patterns of light blue and white.

Reichenbach, 2012-12-06 These two volumes form a full portrait of Hans Reichenbach from the school boy and university student to the maturing and creative scholar who was as well an immensely devoted teacher and a gifted popular writer and speaker on science and philosophy We selected the articles for several reasons Many of them have not previously been available in English many are out of print either in English or in German some especially the early ones have been little known and deal with subject matters other than philosophy of science The genesis and evolution of Reichenbach's ideas appeared to be of deep interest and so we included papers from four decades despite occasional redundancy We were for example pleased to include his extensive review article from the encyclopedic *Handbuch der Physik* of 1929 on The Aims and Methods of Physical Knowledge written at a time of creative collaboration between Reichenbach's Berlin group and the Vienna Circle of Schlick and Carnap Reichenbach was a pioneer opening new pathways to the solution of age old problems in many fields space time causality induction and probability philosophical analysis and interpretation of classical physics relativity and quantum physics logic language ethics scientific explanation and methodology critical appreciation and reconstruction of past metaphysical thinkers and scientists from Plato to Leibniz and Kant Indeed his own philosophical journey was initiated by his passage from Kant to anti Kant      Catalog of Information United States Military Academy, 1949      **Selected Writings of Richard McKeon** Richard P. on Zufall und Gesetz in the creative critique and articulation in his classical monograph of 1958 on The Mental and the Physical and the reader will want to turn to some of the seventy other titles in our Feigl bibliography appended Professor Feigl has been a model philosophical worker above all else honest self aware open minded and open hearted keenly devotedly and even arduously the student of the sciences he has been a logician and an empiricist Early on he brought the Vienna Circle to America and much later he helped to bring it back to Central Europe The story of the logical empiricist movement and of Herbert Feigl s part in it has often been told importantly by Feigl himself in four papers we have included here     **Bulletin** United States.
