Decolonizing Civil Society in Mozambique Tanja Kleibl, 2021-08-26 By demonstrating that Western conceptions of civil society have provided the framework for interpreting societies in the Global South Decolonizing Civil Society in Mozambique argues that it is only through a critical deconstruction of these concepts that we can start to re balance global power relationships both in academic discourse and in development practices Examining the exclusionary discourses framing the support for Western type NGOs in the development discourse often to the exclusion of local social actors this book dissects mainstream contemporary ideas about civil society and finds a new means by which to identify local forms of social action often based in traditional structures and spiritual discourses Outlining new conceptual ideas for an alternative framing of Mozambique s civil society Kleibl proposes a series of fresh theoretical issues and questions alongside empirical research moving towards a series of new policy and practice arguments for rethinking and decolonizing civil society in the Global South

The Politics of Peace in Mozambique Carrie Manning, 2002-11-30 Manning examines issues of democratization and conflict resolution through the lens of the Mozambican experience from 1992 2000 Since the end of the Cold War a formal democratization process has been at the center of virtually every negotiated peace agreement to end a civil conflict Nearly a decade after the Rome peace accord put an end to 16 years of civil war Mozambique stands out as one of the world s most unlikely postwar democratization success stories What accounts for the durability of the postwar political settlement What lessons does the Mozambican experience hold for other such cases Relying on original research conducted in Mozambique between 1994 and 1999 Manning argues that the country s relatively successful postwar political settlement depends upon the ability of the system to accommodate conflicting notions of democratic and system legitimacy through routine recourse to processes of sustained elite bargaining which supplement formal democratic institutions In building her case Manning provides a thorough and provocative analysis of the country s civil conflict presents ground breaking work on the transformation of the Renamo rebel group into a political party and the separation of the Relimo party state into its respective components and he presents a clear eyed analysis of the lessons and limits of Mozambique s postwar success Of particular interest to scholars students and policymakers involved with democratization conflict resolution and southern African politics

Transforming Mozambique M. Anne Pitcher, 2002-11-14 Many of the economic transformations in Africa have been as dramatic as those in Eastern Europe Yet much of the comparative literature on transitions has overlooked African countries This 2002 study of

Mozambique's shift from a command to a market economy draws on a wealth of empirical material including archival sources interviews political posters and corporate advertisements to reveal that the state is a central actor in the reform process despite the claims of neo liberals and their critics Alongside the state social forces from World Bank officials to rural smallholders have also accelerated thwarted or shaped change in Mozambique M Anne Pitcher offers an intriguing analysis of the dynamic interaction between previous and emerging agents ideas and institutions to explain the erosion of socialism and the politics of privatization in a developing country She demonstrates that Mozambique's political economy is a heterogeneous blend of ideological and institutional continuities and ruptures

Courts and Power in Latin America and Africa B. Wilson, S. Gløppen, R. Gargarella, Morten Kinander, E. Skaar, 2016-04-30 Why do courts hold political power holders accountable in some democratic and democratizing countries but not in others And why do some courts remain very timid while others under seemingly similar circumstances become hyper active This is a valuable contribution to the ongoing debate over the issue of democratic accountability

Dams, Displacement, and the Delusion of Development Allen F. Isaacman, Barbara S. Isaacman, 2013-04-10 Cahora Bassa Dam on the Zambezi River built in the early 1970s during the final years of Portuguese rule was the last major infrastructure project constructed in Africa during the turbulent era of decolonization Engineers and hydrologists praised the dam for its technical complexity and the skills required to construct what was then the world s fifth largest mega dam Portuguese colonial officials cited benefits they expected from the dam from expansion of irrigated farming and European settlement to improved transportation throughout the Zambezi River Valley to reduced flooding in this area of unpredictable rainfall The project however actually resulted in cascading layers of human displacement violence and environmental destruction Its electricity benefited few Mozambicans even after the former guerrillas of FRELIMO Frente de Libertação de Moambique came to power instead it fed industrialization in apartheid South Africa Richard Roberts This in depth study of the region examines

the dominant developmentalist narrative that has surrounded the dam chronicles the continual violence that has accompanied its existence and gives voice to previously unheard narratives of forced labor displacement and historical and contemporary life in the dam's shadow *Good Intentions* Shepard Forman, Stewart Patrick, 2000 Includes statistics
