On The Brink Of Extinction Conserving The Diversity Of Life:

On the Brink of Extinction Edward C. Wolf, 1987 Introduction A biologically depleted world Exploring terra incognita Reweaving the web of life Evolutionary responsibility Notes **The Diversity of Life** Edward O. Wilson, 1992 View a collection of videos on Professor Wilson entitled On the Relation of Science and the Humanities In the Amazon Basin the greatest violence sometimes begins as a flicker of light beyond the horizon There in the perfect bowl of the night sky untouched by light from any human source a thunderstorm sends its premonitory signal and begins a slow journey to the observer who thinks the world is about to change Watching from the edge of the Brazilian rain forest witness to the sort of violence nature visits upon its creatures Edward O Wilson reflects on the crucible of evolution and so begins his remarkable account of how the living world became diverse and how humans are destroying that diversity Wilson internationally regarded as the dean of biodiversity studies conducts us on a tour through time traces the processes that create new species in bursts of adaptive radiation and points out the cataclysmic events that have disrupted evolution and diminished global diversity over the past 600 million years The five enormous natural blows to the planet such as meteorite strikes and climatic changes required 10 to 100 million years of evolutionary repair The sixth great spasm of extinction on earth caused this time entirely by humans may be the one that breaks the crucible of life Wilson identifies this crisis in countless ecosystems around the globe coral reefs grasslands rain forests and other natural habitats Drawing on a variety of examples such as the decline of bird populations in the United States the extinction of many species of freshwater fish in Africa and Asia and the rapid disappearance of flora and fauna as the rain forests are cut down he poignantly describes the death throes of the living world s diversity projected to decline as much as 20 percent by the year 2020 All evidence marshaled here resonates through Wilson s tightly reasoned call for a spirit of stewardship over the world s biological wealth He makes a plea for specific actions that will enhance rather than diminish not just diversity but the quality of life on earth Cutting through the tangle of environmental issues that often obscure the real concern Wilson maintains that the era of confrontation between forces for the preservation of nature and those for economic development is over he convincingly drives home the point that both aims can and must be integrated Unparalleled in its range and depth Wilson s masterwork is essential reading for those who care about preserving the world biological variety and ensuring our planet s health **The Conservation of Insects and Their Habitats** N.M. Collins, 2012-12-02 The Conservation of Insects and their Habitats is a compilation of papers presented in the 15th Symposium of the Royal Entomological Society of London held at the Department of Physics Lecture Theatre Imperial College London on September 14 15 1989 The papers cover topics on the diversity of entomological habitats and ecological roles around the world and highlight the value of insects to humanity Some practical proposals for conservation especially in tropical forests and on islands where their diversity is greatest are also given This book will add to the continuing force for the conservation and protection of biological diversity of the Earth The Debt Boomerang Susan

George,2019-07-09 This book examines six major Debt Connections six ways in which the third world Debt Boomerang strikes the North as it flies back from the South environmental destruction drugs costs to taxpayers lost jobs and markets immigration pressures and heightened conflict and war **Environmental Assessment Sourcebook: Policies, procedures, and cross-sectoral issues** ,1991 World Bank Technical Paper No 139 Also available Volume 2 ISBN 0 8213 1844 6 Stock No 11844 Volume 3 ISBN 0 8213 1845 4 Stock No 11845 Provides state of the art guidance and information on the procedural requirements and practical aspects of environmental assessment in various sector and location specific contexts Three volumes also available in Arabic Volume 1 ISBN 0 8213 3523 5 Stock No 13523 Volume 2 ISBN 0 8213 3617 7 Stock No 13617 Volume 3 ISBN 0 8213 3618 5 Stock No 13618 *Canadian Issues in Environmental Ethics* Wesley Cragg,Allan Greenbaum,Alex Wellington,1997-06-10 Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business labour and First Nations representatives What is the best path through the tangle of ethical issues surrounding the collapse of the east coast fishery What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice These are the sorts of issues in applied ethics that are tackled in this collection of essays the vast majority of which have been written especially for this volume It is the first Canadian collection of its kind The book is divided in to sections detailing with such topics as the environment and the economy ethical issues relating to non human animals issues of gender and issues relating to native peoples Most of the authors are philosophers though specialists in geography geology and the social sciences are also among the contributors Frequent reference is made to theoretical ethical concerns but the focus throughout is on applied ethics and a variety of case studies are included Examples include essays on animal rights and the case of native hunters surface mining in Northern Ontario the Quebec arctic and fishing communities in the Maritimes Comparisons are frequently drawn to policies and ethical questions arising in other countries most prominently the United States **Biodiversity and Landscapes** Ke Chung Kim,Robert D. Weaver,1994-08-26 Experts from different disciplines discuss the nature origin and possible solutions to the problem of landscape degradation and diminishing global biodiversity **Ecology for Nonecologists** Frank R. Spellman,2008 Written for anyone who works with chemicals or has a general interest in ecology this book examines the interrelationship of life forms in our environment and provides straightforward explanations about the complicated interactions among nature and humans Emphasizing basic concepts definitions and descriptions the author presents illustrative problems in terms of commonly used ecological parameters to provide readers with enough information to make technical and personal decisions about ecology Funneling the broad multidisciplinary field of ecology which incorporates aspects of biology chemistry physics geology meteorology agriculture forestry and more into a single stream the author provides those with backgrounds in only a handful or even none of these disciplines with an easy to read understanding of the functions and values of ecology and its interrelationships with other sciences including ecology s direct impact on our

lives Organized into three parts this book examines the fundamentals of ecology the role of biodiversity and the practical side of ecology Readers will examine such topics as biogeochemical cycles ecological pyramids and the laws of population ecology They will also examine species terrestrial ecosystems and aquatic systems Each chapter ends with a Chapter Review Test

Biodiversity in Land-inland Water Ecotones J. B. Lachavanne, Raphaëlle Juge, 1997 Philosophers writers and scientists from cell biologists to ecologists have long recognized the special nature of boundaries and interface areas of all kinds Among ecologists in particular there has been an upsurge in interest in the sensitive boundary areas of interaction between ecosystems which are called ecotones and which are often characterized by higher biological diversity than adjacent areas

Crisis and Opportunity Francois Falloux, Lee M Talbot, 2013-11-05 Winner of the Prix Pierre Chauleur of the French Academie des Sciences d Outre Mer Until some way is found of dealing with Africa s catastrophic environmental crises none of the continent s other problems will find a long term solution Yet there is hope and Crisis and Opportunity sets out a programme for dealing with the problems successfully Written in a clear and engaging style the book shows how environmental management can be achieved and institutionalized from within Africa rather than through interference from the West by implementing National Environmental Action Plans NEAPS Aware of the urgency of the problems Francois Falloux and Lee Talbot offer practical guidelines based on direct experience and incorporate a great range of relevant case studies and examples Their book will be of enormous importance to the governments local communities and development agencies confronting the issues and may mark a milestone if recovery in Africa is to take place Francois Falloux is Senior Environmental Advisor Africa Region at the World Bank Dr Lee M Talbot is a former Director General of the World Conservation Union IUCN Originally published in 1993
