Negotiating Democracy Gretchen Casper,Michelle M. Taylor,1996-07-15 This book explains why some countries succeed in installing democracy after authoritarian rule and why some of these new democracies make progress toward consolidation Casper and Taylor show that a democratic government can be installed when elite bargaining during the transition process is relatively smooth They view elite bargaining in twenty four transitions cases some where continued authoritarianism was the result others where a democratic government was the result and a third outcome where progress towards consolidation was the end product

Economic and Political Contention in Comparative Perspective Maria Kousis, Charles

Tilly, 2015-12-03 European and American specialists in economic and political processes move beyond earlier debates to look seriously systematically and innovatively at social change and protest with particular attention to the influence of economic change and variation on contentious politics The essays take up two widely recognized but much contested questions in contentious politics how threats and opportunities faced by potential participants in joint political action affect the likelihood character and consequences of that action and how economic change and variation either a constitute significant political threats and opportunities or b shape responses to political threats and opportunities Contributors Maria Kousis Charles Tilly Marc Giugni Julie Berclaz Marc Steinberg Jeffery Broadbent Klaus Eder John K Glenn Dieter Rucht Richard Hogan Maryjane Osa Cristina Corduneanu Husi [A Guide to Reference Books for Small and Medium-sized Libraries, 1984-1994](#) G. Kim Dority, 1995 Describes evaluates and compares more than 1800 reference titles suitable for small and medium sized libraries Covering books in all subject areas published between 1983 and 1993 this work focuses on recent titles Items in non print format such as CD ROMs are also cited **Political Reform In Francophone Africa** John F Clark, 2018-02-07 Most African states experienced only a few fleeting years of democratic rule after independence before succumbing to authoritarianism During the 1970s and 1980s Africans and Westerners alike came to view dictatorship to be as much a part of the region's social landscape as its grinding poverty Yet the end of the Cold War and the sharpening of the economic crisis at the end of the 1980s have breathed new life into campaigns for democracy in Africa shaking the foundations of many long standing autocracies In some cases dramatic transitions took place though the fate of the new democracies is far from certain This volume explores the origins and evolution of political reform movements in several states of francophone Africa The authors first make the case for the distinctiveness of francophone Africa based on the influences of colonial history language and France's contemporary role in Africa then survey the challenges of reform including the problems of transition from authoritarianism and consolidation of democratic regimes Case studies of thirteen former French and Belgian colonies follow organized by level of reform achieved peaceful regime change incremental reforms repressed reform efforts and reform in the midst of war *The European Voter* Jacques Thomassen, 2005-07-28 This book provides a systematic comparative analysis of how and why voting behaviour has changed in Europe in recent decades It has been widely argued that radical changes have occurred in the how and why of voting behaviour in Europe as a result of changes in the structure of society most notably the rise in material affluence and educational attainment and the decline in religious observance and the size of the working class But most tests of this proposition have been undertaken on single countries This book however systematically tests the validity of this proposition across various European countries The argument that social change has altered voting behaviour has been increasingly challenged on the grounds that it takes too little account of changes in the choices that are put before voters by the parties such as the promises and proposals that are put forward at election time This book therefore also assesses the relative explanatory power of claims that voting behaviour has changed because of

changes in society against claims that it responds to changes in the offerings of political parties And it is clear from the analyses reported in this book that contrary to the claims of much of the extant literature the latter argument appears better able to account for many of the patterns and changes in European voting behaviour and thus the book constitutes an important challenge to much current academic orthodoxy This is the first book to provide a systematic comparison of the long term dynamics of the voting behaviour of individual voters across such a wide range of European countries taking into account the dynamics of the choices put before voters by the parties and for the first time relating this to the way voters behave Comparative Politics is a series for students and teachers of political science that deals with contemporary issues in comparative government and politics The General Editors are Max Kaase Professor of Political Science Vice President and Dean School of Humanities and Social Science International University Bremen and Kenneth Newton Professor of Comparative Politics University of Southampton The series is published in association with the European Consortium for Political Research

King of the Mountain Arnold M. Ludwig, 2002-01-01 People may choose to ignore their animal heritage by interpreting their behavior as divinely inspired socially purposeful or even self serving all of which they attribute to being human but they masticate fornicate and procreate much as chimps and apes do so they should have little cause to get upset if they learn that they act like other primates when they politically agitate debate abdicate placate and administrate too from the book King of the Mountain presents the startling findings of Arnold M Ludwig s eighteen year investigation into why people want to rule The answer may seem obvious power privilege and perks but any adequate answer also needs to explain why so many rulers cling to power even when they are miserable trust nobody feel besieged and face almost certain death Ludwig s results suggest that leaders of nations tend to act remarkably like monkeys and apes in the way they come to power govern and rule Profiling every ruler of a recognized country in the twentieth century over 1 900 people in all Ludwig establishes how rulers came to power how they lost power the dangers they faced and the odds of their being assassinated committing suicide or dying a natural death Then concentrating on a smaller sub set of 377 rulers for whom more extensive personal information was available he compares six different kinds of leaders examining their characteristics their childhoods and their mental stability or instability to identify the main predictors of later political success Ludwig s penetrating observations though presented in a lighthearted and entertaining way offer important insight into why humans have engaged

in war throughout recorded history as well as suggesting how they might live together in peace
