Precognition And The Philosophy Of Science:

Precognition and the Philosophy of Science Bob Brier, 1974 **Philosophy of Science and Occult, 1st Ed.** Patrick Grim, 1983-06-30 Philosophy of Science and the Occult has two aims to introduce the philosophy of science through an examination of the occult and to examine the occult rigorously enough to raise central issues in philosophy of science Patrick Grim has compiled selections by authors with divergent views on astrology parapsychology and UFO s to emphasize topics standard to the philosophy of science He discusses issues such as confirmation and selection for testing possibility and a priori probabilities causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values A sketch of where these arise in the collection accompanies the table of contents The context of the occult serves to make the initial introduction of these issues immediately understandable and forcefully compelling *Philosophy of Science and the Occult* Patrick Grim, 1990-07-17 This book both introduces the philosophy of science through examination of the occult and examines the occult rigorously enough to raise central issues in the philosophy of science Placed in the context of the occult philosophy of science issues become immediately understandable and forcefully compelling Divergent views on astrology parapsychology and quantum mechanics mysticism emphasize topics standard to the philosophy of science Such issues as confirmation and selection for testing causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values are discussed Significantly revised this second edition presents an entirely new section of quantum mechanics and mysticism including instructions from N David Mermin for constructing a device which dramatically illustrates the genuinely puzzling phenomena of quantum mechanics A more complete and current review of research on astrology has been included in this new edition and the section on the problem of demarcation has been broadened **Parapsychology, Philosophy, and Spirituality** David Ray Griffin, 1997-01-01 Examines why parapsychology has been held in disdain by scientists philosophers and theologians explores the evidence for ESP psychokinesis and life after death and suggests that these phenomena provide support for a meaningful postmodern spirituality *Divine Foreknowledge and Human Freedom* William Lane Craig, 1991 The ancient problem of fatalism more particularly theological fatalism has resurfaced with surprising vigour in the second half of the twentieth century Two questions predominate in the debate 1 Is divine foreknowledge compatible with human freedom and 2 How can God foreknow future free acts Having surveyed the historical background of this debate in *The Problem of Divine Foreknowledge and Future Contingents* from Aristotle to Suarez Brill 1988 William Lane Craig now attempts to address these issues critically His wide ranging discussion brings together a thought provoking array of related topics such as logical fatalism multivalent logic backward causation precognition time travel counterfactual logic temporal necessity Newcomb s Problem middle knowledge and relativity theory The present work serves both as a useful survey of the extensive literature on

theological fatalism and related fields and as a stimulating assessment of the possibility of divine foreknowledge of future free acts

Aspects of Consciousness Ingrid Fredriksson, 2012-08-02 Throughout the ages the mysteries of what happens when we die and the nature of the human mind have fascinated us In this collection of essays leading scientists and authors contemplate consciousness quantum mechanics string theory dimensions space and time nonlocal space the hologram and the effect of death on consciousness Although many of these topics have traditionally been considered matters for philosophical and religious debate advances in modern science and in particular the science of resuscitation have now enabled an objective scientific approach which bears widespread implications not only for science but for all of humanity

Psychic Exploration: A Challenge for Science Edgar D. Mitchell, 2011-07-01 Psychic Exploration A Challenge for Science is a primer on psychic research life's purpose and the meaning of the universe Originally published in 1974 this landmark anthology of nearly thirty chapters on every area of psychic research is finally available again Edgar D Mitchell Apollo 14 astronaut and moonwalker as well as a distinguished researcher of the study of human consciousness brought together eminent scientists to write about issues once considered too controversial to discuss This book includes fascinating chapters on the history of parapsychology telepathy hauntings psychic phenomena and consciousness along with an extensive glossary and index This timeless anthology continues to be appealing as a reference work for those curious about the history of parapsychology fans of the world of psi and readers interested in the meaning of the universe Contributors include Willis W Harman Jean Houston Stanley Krippner Robert Masters William G Roll Russell Targ Charles T Tart Montague Ullman and many more perhaps the most important change since the initial publication of Psychic Exploration has been due to advancements in quantum physics If this trend continues then the age old puzzle at the core of religious epiphanies mystical insight and creative genius will finally yield to scientific explanations What is the true nature of consciousness From the New Foreword by Marilyn Schlitz PhD and Dean Radin PhD

ESP and Psychokinesis Stephen E. Braude, 2002 This work was the first sustained philosophical study of psychic phenomena to follow C D Broad's LECTURES ON PSYCHICAL RESEARCH written nearly twenty years earlier The author clearly defines the categories of psychic phenomena surveys the most compelling experimental data and traces their implications for the philosophy of science and the philosophy of mind He considers carefully the abstract presuppositions underlying leading theories of psychic phenomena and he offers bold criticisms of both mechanistic analyses of communication and psychophysical identity theories In addition he challenges the received view that experimental repeatability is the paramount criterion for evaluating parapsychological research and he exposes the deep confusions underlying Jung's concept of synchronicity

Critical Reflections on the Paranormal Michael F. Stoeber, Hugo Anthony Meynell, 1996-01-01 Collection of essays that clarifies and evaluates the various aspects of paranormal phenomena including telepathy psychokinesis trance mediumship near death experiences and past life memories

Counter-Movements in the Sciences H. Nowotny, H. Rose, 2012-12-06 Heretical thoughts in an

orthodox series on sociology of the sciences Devils and science between the covers of one book Games with ambivalence to mask collective uncertainty We anticipate similar future reactions from readers or reviewers when assessing the way in which this volume has been assembled But writings on counter science like the history of colonialism are usually written by the winners therefore unequivocally partial and only too often lacking in social imagination In seeking to redress the balance we admit to having been fully receptive to the latter of having displayed an unmeasured degree of sympathy with heretics and outsiders including practising scientists and to letting science defend itself The antithetical relationship implied in the volume's title Counter movements in the Sciences stands for what we regard as an ongoing open ended process In collecting material for this volume we have brought together voices speaking from different quarters there are those who although modestly claiming to speak only for themselves have set out to question sacred assumptions of scientific faith or to cast doubt on well known claims scientific knowledge holds over other forms of knowledge others have undertaken to demonstrate the fragility if not untenability of attempts at demarcation between science and other systems of belief or practice or shown that demarcations between different forms of rationality rest on other than methodological grounds finally those who wish to rearrange by mapping out some meta point of surveillance familiar territory showing the need for rearrangement and

The Philosophy of Parapsychology Betty Shapin, Lisette Coly, 1977 **Frames of Meaning** HM Collins, TJ Pinch, 2013-04-15 Originally published in 1982 Taking a radical interpretation of the Kuhnian concept of paradigm incommensurability the authors begin by discussing the difficulties of gaining access to the ideas of communities with different rational categories and then define the subject area of parapsychology offering a review of the relevant literature After exploring parapsychology's compatibility with science physics psychology and quantum theory the authors move on from this predominantly theoretical framework and devote the middle section to an empirical study of metal bending They conclude with an examination of the results analyse diverse interpretations and investigate the consequences for the idea of scientific revolution

The Only Wise God William L. Craig, 2000-01-13 Does God know our actions before we do them And if so do human beings truly have free will Dr Craig contends that both of these notions are compatible showing how the Bible teaches divine foreknowledge of human free acts and reveals two ways of reconciling divine omniscience with human freedom

The Journal of Parapsychology Joseph Banks Rhine, Charles Edward Stuart, William McDougall, 1980 **Journal of the Society for Psychical Research** Society for Psychical Research (Great Britain), 1998 *Consciousness Unbound* Edward F. Kelly, Paul Marshall, 2021-03-16 Building on the groundbreaking research of Irreducible Mind and Beyond Physicalism Edward Kelly and Paul Marshall gather a cohort of leading scholars to consider the significance of extraordinary experiences for our understanding of reality Currently emerging as a middle ground between warring fundamentalisms of religion and science an expanded science based understanding of nature finally accommodates empirical realities of spiritual sorts while also rejecting rationally untenable overbeliefs The vision sketched here provides an antidote to the prevailing

postmodern disenchantment of the world and demeaning of human possibilities It not only more accurately and fully reflects our human condition but engenders hope and encourages ego surpassing forms of human flourishing It offers reasons for us to believe that freedom is real that our human choices matter and that we have barely scratched the surface of our human potentials It also addresses the urgent need for a greater sense of worldwide community and interdependence a sustainable ethos by demonstrating that under the surface we and the world are much more extensively interconnected than previously recognized

Heart of the Living God Michael G. Maness, 2004-06-23 Maness asks us to tie up our sneakers for we are going to have some fun as we hike into the Grand Canyon of Love Love is the treasure of life It is Love all the way Nothing else really matters outside of Love Best of all our Love will only get better in heaven The treasured ability to have loving relationships is Gods gift to us in our Imago Deithe image of God we all share Likewise what we know of Love this side of heaven is but a dusty image of what God experiences I want to get personally involved says Maness Can we have a free will relationship with anyone even God if all of what we do and think is settled I dont think so Love is greater than that and I shall prove that and that is indeed a Grand Canyon Manes brings some of the brain splitting complexities of this to light with good humor introduces dynamic foreknowledge and challenges Classical Theisms avoidance of Love And he exposes some foul play in the process Thats the first half of the book For those wanting to strike out on their own wanting to see more of the depth and diversity of the Grand Canyon the second half contains reviews of about 60 major authors a 4 000 Abysmal Bibliography and a huge index to just about everything in the book Maness has thrown a gauntlet before the Classical Theists So tie up your sneakers and take a hike with Michael G Maness as he walks with you into the Grand Canyon see more at www.PreciousHeart.net

The Journal of Philosophy, Psychology, and Scientific Methods Frederick James Eugene Woodbridge, Wendell T. Bush, 1920 *The Journal of Philosophy, Psychology and Scientific Methods*, 1920 *Psychokinesis* Stanley Krippner, 1977-11 The history of humankind cannot be charted as a steady linear upward slope but rather as a series of quantum jumps of short duration separated by plateaus of varying duration during which no progress occurred During these periods of no progress the revolutionaries who produced the preceding quantum jump pass from the scene their principles and concepts become concretized as dogma and a new establishment is born whose sacred duty is the protection of the dogma against the new revolutionaries The last quantum jump was the scientific revolution of the nineteenth century which laid the groundwork for our present technological civilization and perhaps more important also shaped our philosophical view of what is a human being Since the basis of this scientific revolution was reason logic measurement and total reliance upon the organized senses the resultant view of the person is that of an automaton functioning in a clockwork world The power of this view is evident in the advances made in medical science up until the 1950s The twin triumphs of sanitation and preventive medicine and the development of the antibiotic concept completely revolutionized the practice of medicine and by 1950 those of us in the profession were anticipating a new golden age of medicine But in fact the reality has

been disaster The mechanistic view of humanity has led to more and more technological applications of ever increasing complexity and cost and ever decreasing efficiency
