There have been many attempts to explain life For the most part they are variants on a religious or mystical theme These provide a purpose to life but not the purpose of life A full rational explanation of our existence based on our rapidly accumulating scientific knowledge has eluded us until now The explanation of life which is offered in this book draws on three main components evolution genetics and psychology However something exists in our mind which stops us from seeing clearly what is already before us Once this block is removed we can view life objectively and see it as a special form of information which has arisen through evolution Information is identified as the unifying entity of the universe which is inherent in the spatial arrangement of matter This book relates these findings to our world and our lives It sets out in rational terms where we came from how we got here and finally reveals our destiny www.thelastbook.co.uk *Spiritual Intelligence and the Neuroplastic Brain* Charles W. Mark Ph. D.,Charles W. Mark,2010 Our brains are getting wired differently in the world of digital technology information revolution and in the inter cultural world of global society Think of the new vocabulary Global brain collective intelligence global village and cyberspace That should tell us something about the neural rewiring that is taking place inside of our brains whether or not we are aware of it The fact that the human brain changes throughout a person s life in response to intellectual stimulation physical exercise exposure to new cultural environments learning opportunities and challenges is a revolutionary discovery Till twenty years ago neuroscientists believed in the conventional theory that the brain s ability at making new neural connections stopped before a child entered adolescence That is the old dogma There is a Second Copernican Revolution taking place inside of our brains writes the author quoting Carl Zimmer Some experts are suggesting that we are already living in what Richard Restack calls the neurosociety Ray Kurzweil the futurist is predicting that by 2045 A D human beings will be living in an era of singularity when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times What is going to be the fate of the human spirit human spirituality the feeling of connection to a force and power that is greater than us God our ability to use spiritual imagination and our intelligence Are we progressively moving away from religion and community based spirituality into the spirituality of different strokes for different folks In his groundbreaking book *Spiritual Intelligence and The Neuroplastic Brain A Contextual Interpretation of Modern History* Charles W Mark takes the reader on a journey through modern history and shows the glimpse of what is to come <http://www.spiritualityintelligence.com>

Problems of Living Dan J. Stein,2021-05-11 *Problems of Living Perspectives from Philosophy Psychiatry and Cognitive Affective Science* addresses philosophical questions related to problems of living including questions about the nature of the brain mind reason and emotion happiness and suffering goodness and truth and the meaning of life It draws on critical pragmatic and embodied realism as well as moral naturalism and brings arguments from metaphysics epistemology and ethics together with data from cognitive affective science This multidisciplinary integrated approach provides a novel framework for considering not only the nature of mental disorders but also broader issues in mental health such as finding pleasure and purpose in life Draws on the strongest aspects of polar positions in philosophy and psychiatry to help resolve important perennial debates in these fields Explores continuities between early philosophical work and current cognitive affective sciences including neuroscience and psychology Employs findings from modern cognitive affective science to rethink key long standing debates in philosophy and psychiatry Builds on work showing how mind is embodied in the brain and embedded in society to provide an integrated conceptual framework Assesses both the insights and the limitations of cognitive affective science for addressing the big questions and hard problems of living **Basic Types of Pastoral Care & Counseling** Howard John Clinebell,Howard Clinebell,Bridget Clare McKeever,2011 *Basic Types of Pastoral Care and Counseling* remains the standard in pastoral care and counseling This third edition is enlarged and revised with updated resources methods exercises and illustrations from actual counseling sessions This book will help readers be sensitive to cultural diversity ethical issues and power dynamics as they practice holistic growth oriented pastoral care and counseling in the parish Suitable Heresies Graham Rabey,2009 The theory suggests that there is a structural similarity between certain basic brain forms and certain basic mind forms and that the former provide a credible explanation for the latter It does not suggest that the causative link has been proved thereby What is claimed is that in the jungle of brain mind research where fundamental physical evidence for speculation is often in short supply the theory provides a scientifically and philosophically arguable clearing and thus a hypothesis worthy of investigation by anyone interested in the mysteries of human thought One implication of the theory amounts to a central heresy namely that on the accumulating evidence our traditional and much cherished one truth thinking conventions will need to be replaced by two truth thinking conventions Another implication of the theory is that it now seems entirely possible that the emergence and nature of philosophy itself have been crucially dependent on our long human struggle to extract single responses from thinking equipment that appears necessarily i e anatomically double and circular the double cycles being mutually inverted **Science, Religion, and the Meditative Mind** J. Richard Wingenter,2003-05-07 *Meditative mind awareness* gives one a proper understanding of what science and what religion is The meditative mind sees itself as fundamentally different from the scientific mind and from the mind to which ordinary religion relates
