

# DEPRIVATION OF RIGHTS

Three-quarters of citizens of Montenegro assess that deprivation of right solely on the basis of some personal feature is not justified, with no exceptions, although one-fifth (21%) tends to claim that generally it is not justified, but there are circumstances when it is. Situation is almost identical as it was in 2016, and concerning as it points that this percentage of citizens still does not understand that there is no justification for discrimination.

**Rights and Deprivation** Lesley A. Jacobs, 1993 Many welfare state programs redistribute resources from some citizens to others This book discusses whether such a redistribution can be justified by a theory of moral rights Lesley Jacobs maintains that while many orthodox rights based defenses of state welfare are misconceived it is nevertheless possible to defend programs such as universal access to health care and social security on the grounds that they are required to fulfill the moral rights of individual citizens

**Human Rights** Charles R. Beitz, 2011-07-28 Human rights have become one of the most important moral concepts in global political life over the last 60 years Charles Beitz one of the world's leading philosophers offers a compelling new examination of the idea of a human right

**The Cambridge Handbook of New Human Rights** Andreas von Arnould, Kerstin von der Decken, Mart Susi, 2020-01-02 The book provides in depth insight to scholars practitioners and activists dealing with human rights their expansion and the emergence of new human rights Whereas legal theory tends to neglect the development of concrete individual rights monographs on new rights often deal with structural matters only in passing and the issue of new human rights has received only cursory attention in literature By bringing together a large number of emergent human rights analysed by renowned human rights experts from around the world and combining the analyses with theoretical approaches this book fills this lacuna The comprehensive and dialectic approach which enables insights from individual rights to overarching theory and vice versa will ensure knowledge growth for generalists and specialists alike The volume goes beyond a purely legal analysis by observing the contestation rhetorics the struggle for recognition of new human rights thus speaking to human rights professionals beyond the legal sphere

*Human Rights* Adam Etinson, 2018 Over the past decade or so philosophical speculation about human rights has tended to fall into two streams On the one hand there are Orthodox theorists who think of human rights as natural rights moral rights that we have simply in virtue of being human On the other hand there are Political theorists who think of human rights as rights that play a distinctive role or set of roles in modern international politics setting universal standards of political legitimacy serving as norms of international concern and or imposing limits on the exercise of national sovereignty This edited volume explores this disagreement its underlying sources and related issues in the philosophy of human rights Using the Orthodox Political debate as a springboard for broader reflection the volume covers a diverse range of questions about the relevance of the history of human rights to their philosophical comprehension how to properly understand the relationship between human rights morality and law how to balance the normative character of human rights their description of an ideal world with the requirement that they be feasible in the here and now the role of human rights in a world shaped by politics and power and how to reconcile the individualistic and communitarian aspects of human rights All chapters are accompanied by useful and probing commentaries which help to create dialogues throughout the entire volume

*Reconstructing Human Rights* Joe Hoover, 2016-05-27 We live in a human rights world The language of human rights claims and numerous human rights institutions shape almost all aspects of our political lives yet we struggle to know how to judge this development Scholars give us good reason to be both supportive and sceptical of the universal claims that human rights enable alternatively suggesting that they are pillars of cross cultural understanding of justice or the ideological justification of a violent and exclusionary global order All too often however our evaluations of our human rights world are not based on sustained consideration of their complex ambiguous and often contradictory consequences *Reconstructing Human Rights* argues that

human rights are only as good as the ends they help us realise We must attend to what ethical principles actually do in the world to know their value So for human rights we need to consider how the identity of humanity and the concept of rights shape our thinking structure our political activity and contribute to social change Reconstructing Human Rights defends human rights as a tool that should enable us to challenge political authority and established constellations of political membership by making new claims possible Human rights mobilise the identity of humanity to make demands upon the terms of legitimate authority and challenges established political memberships In this work it is argued that this tool should be guided by a democratising ethos in pursuit of that enables claims for more democratic forms of politics and more inclusive political communities While this work directly engages with debates about human rights in philosophy and political theory in connecting our evaluations of the value of human rights to their worldly consequences it will also be of interest to scholars considering human rights across disciplines including Law Sociology and Anthropology The Rights of Refugees under International Law James C. ### **Multinational Enterprises and Human Rights**

Alexandra Gatto,2011-01-01 This well researched book examines how the European Union could do more to ensure that EU based multinational enterprises MNEs respect human rights when operating in third world countries Alexandra Gatto identifies the primary obligations of MNEs as developed by international law and investigates how the EU has promoted the respect of human rights obligations by the MNEs to date The significant gap between the EU s commitment to the respect and promotion of human rights the potential to regulate the conduct of MNEs and the EU s reluctance to impose human rights obligations on MNEs is thoroughly explored It is suggested that the current human rights law should be developed and this timely book recommends that the EU should firmly link the promotion of MNEs human rights obligations to international human rights law thereby supporting the constitution of an international law framework within the UN Multinational Enterprises and Human Rights will be of very great interest to scholars of EU or international human rights as well as NGOs and policymakers in international organizations and corporations that support corporate social responsibility and human rights

Sonja C. Grover,2025-02-24 The cases analysed involve litigation concerning a disparate range of contemporary US culture wars including equity in access to public services unrestricted by religious bias resistance to the teaching of historical facts relating to racial tensions in America including the so called critical race theory debate the right of schoolchildren to exposure concerning a diversity of views current USSC litigation about US university admissions policy that considers race ethnicity as one factor amongst many in admission contemporary cases concerning the constitutionality of US abortion law grounded on Roe v Wade and the scope of State and indigenous sovereign powers These contemporary culture war US landmark cases are then compared to similar cases in non US jurisdictions and courts to consider in more depth the underlying core issues in these cases The book highlights the risk to a democracy of recasting fundamental human rights litigation as essentially nothing more than the sorting out of political quagmires and cultural conflicts best left to the discretion of government rather than the courts Then the major risk is that constitutional controversies will increasingly not be decided by an independent judiciary but rather by self interested politicians as the courts more often than not decline to weigh in on highly sensitive human rights controversies A further risk is that instead such cases will be decided through a judicial majoritarian political lens rather than a largely apolitical consensus judicial opinion constructed by both philosophically left leaning so called liberal and right leaning so called conservative jurists
