*The African American Urban Experience* J. Trotter, E. Lewis, T. Hunter, 2004-03-17 From the early years of the African slave trade to America blacks have lived and laboured in urban environments Yet the transformation of rural blacks into a predominantly urban people is a relatively recent phenomenon only during World War One did African Americans move into cities in large numbers and only during World War Two did more blacks reside in cities than in the countryside By the early 1970s blacks had not only made the transition from rural to urban settings but were almost evenly distributed between the cities of the North and the West on the one hand and the South on the other In their quest for full citizenship rights economic democracy and release from an oppressive rural past black southerners turned to urban migration and employment in the nation s industrial sector as a new Promised Land or Flight from Egypt In order to illuminate these transformations in African American urban life this book brings together urban history contemporary social cultural and policy research and comparative perspectives on race ethnicity and nationality within and across national boundaries

**Migrants, Markets, and Mayors** Luc Christiaensen, Nancy Lozano-Gracia, 2024-01-12 Research on migration and urban development in Africa has primarily focused on larger cities and rural to urban migration However 97 percent of Africa s urban centers have fewer than 300 000 inhabitants and a sizable share of urban migrants come from other urban areas A more holistic and dynamic perspective incorporating migration flows along the full urban hierarchy as well as urban urban migrants is needed to better understand and leverage migration for urban development *Migrants Markets and Mayors Rising above the Employment Challenge in Africa s Secondary Cities* draws on demographic data research literature key informant interviews and empirical research to better understand how migrants in Africa s secondary cities fare in urban labor markets

how they affect aggregate urban productivity and how mayors can leverage migrants potential to the benefit of all It explores these questions across countries and four urban case settings Jijiga in Ethiopia Jinja in Uganda and Jendouba and Kairouan in Tunisia Although mayors in secondary cities often see migrants as a burden to their cities labor markets and a threat to development the report finds that migrants contribute increasingly less to urban population growth and that they usually strengthen the resident labor force The report also finds that labor market outcomes for migrants are at least as good as those for nonmigrants Africa s secondary cities are well placed to leverage migration but evidence based policies are needed to manage the growth and development of land and labor markets The report reviews policy options that mayors can take to strengthen the financial technical and planning capacity of secondary cities and better leverage migration to benefit migrants and nonmigrants alike Much of the literature on migration to cities examines migration in a nonspatial fashion or focuses on rural urban migration to the largest most visible cities This volume fills a gap by focusing on migration to secondary cities coming up with a compelling set of facts Overall the volume is very well done and sets a benchmark for future research J
