

A person is captured mid-jump, silhouetted against a bright, cloudy sky. They are wearing a red jacket, dark pants, and a backpack. Their legs are spread wide in a dynamic pose. Below them, a vast landscape of mountains and a body of water is visible, suggesting a high-altitude or coastal setting. The overall mood is one of adventure and risk-taking.

**Black Enterprise** ,1993-10 BLACK ENTERPRISE is the ultimate source for wealth creation for African American professionals entrepreneurs and corporate executives Every month BLACK ENTERPRISE delivers timely useful information on careers small business and personal finance *Risk Taking* Zur Shapira, 1995-01-25 Classical economic theory assumes that people in risk situations follow a course of action based on a rational consistent assessment of likely outcomes But as Zur Shapira demonstrates in *Risk Taking* corporate managers consistently stray from the prescribed path into far more subjective territory *Risk Taking* offers a critical assessment of the relationship between theory and action in managerial decision making Shapira offers a definitive account of the classical conception of risky decision making which derives behavioral prescriptions from a calculation of both the value and the likelihood of possible outcomes He then demonstrates how theories in this vein have been historically at odds with empirical observations *Risk Taking* reports the results of an extensive survey of seven hundred managers that probed their attitudes and beliefs about risk and examined how they had actually made decisions in the face of uncertainty The picture that emerges is of a dynamic flexible process in which each manager s personal expertise and perceptions play profound roles Managerial strategies are continually modified to suit changing circumstances Rather than formulating probability estimates executives create potential scenarios based not only on the possible outcomes but also on the many arbitrary factors inherent in their own situations As Shapira notes risk taking

propensities vary among managers and the need to maintain control and avoid particularly dangerous results exercises a powerful influence Shapira also examines the impact of organizational structure long term management objectives and incentives on decision making With perceptive observations of the cognitive emotional and organizational dimensions of corporate decision making Risk Taking propels the study of managerial risk behavior into new directions This volume signals the way toward improving managerial decision making by revealing the need for more inclusive choice models that augment classical theory with vital behavioral observations

Bunten, 2017-03-08 Risk taking is foundational to the structure and goals of higher education Encouraging students to consider new diverse even uncomfortable ideas is needed to develop a critically informed view of the world and establish one's own values and beliefs Yet students and parents are increasingly averse to risk taking in higher education a shift evidenced by calls for colleges and universities to provide an education that shelters students from diverse and potentially controversial ideas and topics This tension over the necessary role of risk taking in higher education represents a critical moment for American education This volume includes authors from numerous academic disciplines to emphasize both the importance of risk taking across higher education and to highlight the varied approaches to incorporate risk taking into classroom practices The authors' collective works in this volume reaffirm the critical need to reject intellectual coddling and commodification in the college classroom and to promote intellectual risk taking as an essential aspect of higher education Sustained systematic

emphasis on risk taking in higher education is key to promoting innovation critical thinking life long learning and moral ethical development     The Culture of Adolescent Risk-taking Cynthia Lightfoot, 1997-03-14 Based on interviews with forty one teenagers Lightfoot argues that adolescent risk taking is necessary in establishing a sense of self and peer group identities
