Haimes, David A. Moser, Eugene Z. Stakhiv, 1996 Twenty nine essays from the conference examine such topics as regulatory reform environmental world views and water resources policy and engineering decision making under global change modeling and solving water resources engineering design problems reliability of a box culvert structure under a levee during project floods project planning in developing countries the influence of trust on risk based decision making urban stormwater quality management risk reduction of lead and mercury and measures of water distribution system reliability Annotation copyright by Book News Inc Portland OR *Risk-based Decision Making in Water Resources* Yacov Y. Haimes, Eugene Z. Stakhiv, 1990 Proceedings of the Fourth Engineering Conference held in Santa Barbara California October 15 20 1989 This collection contains 20 papers that address the application of risk analysis to a wealth of water resources problems Current risk assessment issues confronting water resources planners are evaluated along with areas of uncertainty Requirements and procedures currently promoted by engineers in federal and state water resources agencies are identified Decision analysis methods and or models that can explicitly incorporate risk preferences are reviewed In addition various risk methodologies are discussed as they apply to dam safety flood control environmental impacts and other social economic and technological aspects of water resources planning and management *Risk-based Decisionmaking in Water Resources IX* Yacov Y. Haimes, David A. Moser, Eugene Z. Stakhiv, 2001 **Research and Practice in Multiple Criteria Decision Making** Yacov Y. Haimes, Ralph E. Steuer, 2012-12-06 During the past two decades the consideration of multiple objectives in modeling and decision making has grown by leaps and bounds The nineties in particular have seen the emphasis shift from the dominance of single objective modeling and optimization toward an emphasis on multiple objectives The proceedings of this Conference epitomize these evolutionary changes and contribute to the important role that the field of multiple criteria decision making MCDM now plays in planning design operational management and policy decisions Of special interest are the contributions of MCDM to manufacturing engineering For example it has recently been recognized that optimal single objective solutions have often been pursued at the expense of the much broader applicability of designs and solutions that satisfy multiple objectives In particular the theme MCDM and Its Worldwide Role in Risk Based Decision Making of the XIVth International Conference on Multiple Criteria Decision Making Charlottesville Virginia USA June 8 12 1998 represents the growing importance of risk cost benefit analysis in decision making and in engineering design and manufacturing In such systems minimizing the of rare and extreme events emerges as an essential objective that risk complements the minimization of the traditional expected value of risk along with the objectives attached to cost and performance These proceedings include forty

five papers that were presented at the Conference A variety of techniques have been proposed for solving multiple criteria decision making problems The emphasis and style of the different techniques largely reflect the fields of expertise of their developers

Haimes, 2005-01-21 An updated and timely new look at the theory and practice of risk management Since the first edition of *Risk Modeling Assessment and Management* was published public interest in the field of risk analysis has grown astronomically Its adaptation across many disciplines and its deployment by industry and government agencies in decision making has led to an unprecedented development of new theory methodology and practical tools The Second Edition of this well regarded reference describes the state of the art of risk management and its important applications in such areas as engineering science manufacturing business management and public policy The author strikes a balance between the quantitative and the qualitative aspects of risk management showing clearly how to quantify risk and construct probability in conjunction with real world decision making problems At the same time he addresses a host of institutional organizational political and cultural considerations Incorporating real world examples and case studies to illustrate the analytical methods under discussion the book presents basic concepts as well as advanced material avoiding higher mathematics whenever possible Some key revisions to the Second Edition include A completely updated format with many new examples and problems A new chapter on Risks of Terrorism including case studies in transportation water supply infrastructure interdependencies food safety and a National Research Council report on terrorism A new chapter on Risk

Filtering Ranking and Management RFRM a technology co developed by the author and supported by several case studies and examples A new focus on minimizing the high cost associated with today s more extensive risk management Examining timely multidisciplinary practical applications this new edition offers an important resource for industry professionals as well as advanced graduate students in systems engineering Decentralization and Coordination of Water Resource Management Douglas D. Parker,Yacov Tsur,2011-07-08 Centralized top down management of water resources through regulations has created unnecessary economic burdens upon users More flexible decentralized controls through the use of economic incentives have gained acceptance over the past decade The theme of this book is the increasing efforts throughout water scarce regions to rely upon economic incentives and decentralized mechanisms for efficient water management and allocation The book begins with a section of introductory chapters describing water systems institutions constraints and similarities in the following regions Israel and the Middle East Turkey California Florida and Australia Four of these regions face similar climates with wet winters and dry summers Florida has a more even seasonal distribution of rainfall yet it uses similar management strategies in controlling groundwater demand and water quality The book concludes with a section on water management case studies These case studies examine issues of conflict related to both water quality and water quantity While the case studies address both international and intranational concerns in specific regions of the world they portray broad principles that are applicable to many regions Design of Early Warning and Predictive Source-water Monitoring Systems W. Determining the Economic Value of Water Robert A. Young,John B. Loomis,2014-07-23 Water provides benefits as a commodity for agriculture industry and households and as a public good such as fisheries habitat water quality and recreational use To aid in cost benefit analysis under conditions where market determined price signals are usually unavailable economists have developed a range of alternative valuation methods for measuring economic benefits This volume provides the most comprehensive exposition to date of the application of economic valuation methods to proposed water resources investments and policies It provides a conceptual framework for valuation of both commodity and public good uses of water addressing non market valuation techniques appropriate to measuring public benefits including water quality improvement recreation and fish habitat enhancement The book describes the various measurement methods illustrates how they are applied in practice and discusses their strengths limitations and appropriate roles In this second edition all chapters have been thoroughly updated and in particular the coverage of water markets and valuation of ecosystem services from water has been expanded Robert Young author of the 2005 edition has been joined for this new edition by John Loomis who brings additional expertise on ecosystem services and the environmental economics of water for recreational and other public good uses of water Comprehensive Regulatory Reform Act of 1995 United States.
