T. Gregoire,2013-03-13 One of the United States Food and Drug Administration s most difficult tasks is the assessment of risk benefit ratios for a broad spectrum of therapeutic and prophylactic drugs Furthermore it is now widely recog nized that no drug chemical or even natural substance is completely devoid of risk Nowhere has this issue been the subject of more controversy than with steroidal contraceptive drugs Regulated as a special class of products because of their prophylactic use in healthy individuals for prevention of pregnancy rather than for treatment of disease steroid contraceptives drugs undergo more extensive animal safety tests than any other pharmaceutical agent This view also contemplates the availability of alternative contraceptive measures posing fewer risks but the use of less effective methods must take into consideration the hazards associated with pregnancy itself In April 1983 the Food and Drug Administration and the National Insti tutes of Health in cooperation with the World Health Organization the Population Council and the Agency for International Development sponsored a three day workshop to evaluate current guidelines for preclinical safety studies of contraceptive drugs in light of our extensive knowledge of the side effects of marketed products The meeting included presenta tions by

**Second-Trimester Abortion** G. Berger,W.E. Brenner,L.G. Keith,2012-12-06 Irvin M Cushner MD MPH It is both remarkable and at the same time a sign of this era of rapid change that one can refer back to the infancy of a field which has existed for barely more than a decade Yet one now reads of the maturing of the family planning and abortion fields both of which were incorporated into our society and integrated into our health care system within the past ten years Indeed in the very year that this book is being prepared we note the tenth anniversaries of several significant events of 1970 1 the enactment of Title X of the Public Health Service Act establishing a Federal program in family planning 2 the first issuance by a major health related organization the APHA of a policy statement advocating repeal of all abortion laws and 3 the enactment by New York State of an abortion law whose only restriction was that it be performed by a licensed physician and the subsequent action the first by any local health department New York City to assure both its implementation and its quality They were indeed eventful days These three events seemed to presage a then unprecedented acceptance of fertility regulation as a right and as a needed service      *Abortion and Woman's Choice* Rosalind Pollack Petchesky,2024-03-12 The best book I have read on the politics of reproduction It raises complex theoretical and strategic questions in a clear and accessible way and represents an important breakthrough in feminist thinking Leslie Doyal author of What Makes Women Sick This prize winning study is the definitive work on the politics of abortion and fertility Rosalind Pollack Petchesky

provides overwhelming evidence against the anti abortion forces and in the process takes up issues of teenage sexuality the politics of eugenics and women s relationship to medical technology The book s continuing relevance is a tribute to the author and a sad indictment of contemporary politics Family Planning Programme in India Shanta Kohli Chandra,1987

**Constitutional Amendments Relating to Abortion** United States. Congress. Senate. Committee on the Judiciary. Subcommittee on the Constitution,1983 Foreign Assistance and Related Programs Appropriations for 1982: Agency for International Development ... International organizations. Infant formula code United States. Congress. House. Committee on Appropriations. Subcommittee on Foreign Operations and Related Agencies (1981-1987),1981 *The Climacteric: An Update* H. van Herendaal,B. van Herendaal,F.E. Riphagen,L. Goessens,H. van der Plas,2012-12-06 THE JAN PALFIJN SYMPOSIA In 1979 the Department of Obstetrics and Gynaecology of the Jan Palfijn Hospital in Merksem Antwerp celebrated its 25th Anniver sary To mark the occasion the first symposium was organized the theme chosen being hysteroscopy Thanks to the cooperation of specialists from both within and outside Belgium the event attracted such a large attendance that it was decided to follow up this first venture with others In the light of the experience gained from the first symposium we established the Jan Palfijn Foundation for Gynaecological and Obstetrical Didactics the reasons for this being budgetary and in particular organizational This approach made it possible to attract the cooperation of enthusiastic fellow workers from outside the hospital on a permanent or ad hoc basis and hence to reach a much wider group of experts in all fields both at home and abroad In 1981 the second symposium was held at the Jan Palfijn Hospital the topic being echography in obstetrics and gynaecology Almost all of the Belgian universities were represented and papers were presented by confreres from practically all of the EEC countries When the third symposium was held in 1982 again on hysteroscopy the speakers and audience could literally hardly be squeezed into the Jan Palfijn Hospital s facilities The fourth symposium was accordingly organized in the modern luxurious facilities of the new administration building of the Antwerp Provincial Authority **Primary Maternal and Neonatal Health** Fe Del Mundo,2012-12-06 The First International Congress on Maternal and Neonatal Health IAMANEH chose as its theme Primary Maternal and Neonatal Health Care A Global Concern If the primary goal of all World Health Organization member states of Health For All By The Year 2000 is to be met the most difficult challenge lies in the area of maternal and neonatal health care Indeed the preventable mortal ity of mothers and their newborns related to the quality of maternity care extracts a greater toll in life expect ancy than any specific disease category Such mortality is but the tip of an iceberg of morbidity that saps the quality of life of a majority of this world s citizens They are the less privileged by accident of birth only An intolerable situation exists These Proceedings reflect a world concern by m n s ters of health academicians scientists and providers of maternal and neonatal care No blueprint is offered for solution of this world s greatest health problem But the Proceedings do contain an accurate description of the problem and revealing epidemiological diagnoses that both lay bare deficiencies in care and suggest the way to im prove health for all

The implications of these papers will not bring comfort to those responsible for the allocation of scarce resources for health. They rather suggest radical changes are needed and that failure to make these changes could mean a catastrophic and meaning less loss of life during the balance of this century      Fertility Regulation and the Public Health Sarah L. Tietze, Richard Lincoln, 2012-12-06 A lifetime of work by a dedicated scientist who monitored the growing variety of methods for the control of human fertility and foresaw the need for information on the social psychological economic and political aspects of fertility regulation and the prevention of unwanted pregnancies and births is reflected in the pages of this book. It also chronicles a series of related revolutions: 1 major changes in attitudes to the voluntary control of human fertility; 2 growing freedom of discussion outside the medical community relating to human reproduction; and 3 recognition that governments have an appropriate role to play in programs involving these matters. As a result, official information systems have been established to guide the evaluation of programs and determine if and when changes in policy might be needed. Christopher Tietze, from whose writings the articles in this volume were selected, was a central figure in these developments. He was a physician whose major focus was social statistics. In effect, he became the scorekeeper of the world's efforts to avoid unwanted childbearing. He enlisted an ever growing network of collaborators and prevailed on them to apply new tools to new issues      **Health And Family Planning In Community-based Distribution Projects** Maria Wawer, 2019-03-07 The authors of this book address the major issues involved in developing and evaluating community based delivery (CBD) healthcare services administered by nonmedical workers in developing countries. Ranging from a general discussion of integrated community based programs to the prescription of dose regimens that nonmedical personnel can use in field situations, the contributions cover such topics as nutrition intervention, antihelminthics distribution, oral rehydration therapy, and the efficacy of existing programs designed to train those who administer these services.
