Rituals and Music in Europe Daniel Burgos, 2024-06-14 This book explores modern European religious and non religious rituals and their main features by focusing on music as a key element required for the full expression of beliefs It specifically examines the relationship between religious non religious pagan cultural celebratory and traditional rituals In doing so this text focuses on the extent to which the rituals overlap replace or feed religious or pseudo religious beliefs to create alternative beliefs individual or collective that systematically ignore any religion The book further analyses the relationship between daily habits holidays sports politics culture and other pagan rituals as forms that represent social feelings by identifying enjoying or impersonating emotions and transversally it explores how music facilitates and fosters those emotions The volume also investigates how rituals coexist and mutually influence each other through a representation of religious and non religious rituals and how music plays a central role in that phenomenology The author argues that music is a key part of various types of rituals e g rites of passage and that music supports and enriches the meaning of the ritual to ultimately strengthen the bond of communication with the individual and the group This monograph appeals to students and researchers working in religious studies and in music theory

Sonic Liturgy Guy L. Beck, 2012-12-12 *Sonic Liturgy* Ritual and Music in Hindu Tradition builds on the foundation of Guy L Beck s earlier work which described the theoretical role of sound in Hindu thought *Sonic Liturgy* continues the discussion of sound into the realm of Hindu ritual and musical traditions of worship Beginning with the chanting of the Sama Veda alongside the fire sacrifices of the ancient Indo Aryans and with the classical Gandharva music as outlined in the musicological texts of Bharata and Dattila Beck establishes a historical foundation for an in depth understanding of the role of music in the early Puja rituals and Indian theater in the vernacular poetry of the Bhakti movements in medieval temple worship of Siva and Vishnu in southern India and later in the worship of Krishna in the northern Braj region By surveying a multitude of worship traditions

Beck reveals a continuous template of interwoven ritual and music in Hindu tradition that he terms sonic liturgy a structure of religious worship and experience that incorporates sound and music on many levels In developing the concept and methods for understanding the phenomenon of sonic liturgy Beck draws from liturgical studies and ritual studies broadening the dimensions of each as well as from recent work in the fields of Indian religion and music As he maps the evolution of sonic liturgy in Hindu culture Beck shows how parallel to the development of religious ritual from ancient times to the present there is a less understood progression of musical form beginning with Vedic chants of two to three notes to complicated genres of devotional temple music employing ragas with up to a dozen notes Sonic liturgy in its maturity is manifest as a complex interactive worship experience of the Vaishnava sects presented here in Beck s final chapters

Believing Without Belonging? Vinod John,2020-11-19 This study examines an indigenous phenomenon of the Hindu devotees of Jesus Christ and their response to the gospel through an empirical case study conducted in Varanasi India It analyzes their religious beliefs and social belonging and addresses the ensuing questions from a historical theological and missiological perspective The data reveals that the respondents profess faith in Jesus Christ however most remain unbaptized and insist on their Hindu identity Hence a heuristic model for a contextualized baptism as Guru diksha is proposed The emergent church among Hindu devotees should be considered from the perspective of world Christianity as a disparate form of belonging while remaining within one s community of birth The insistence on a visible church and a distinct community of Christ s followers is contested because the devotees should construct their contextual ecclesiology since it is an indigenous discovery of the Christian faith Thus the Christian label for the adherents is dispensable while retaining their socio ethnic Hindu identity Christian mission should discontinue extraction and assimilation instead missional praxis should be within the given sociocultural structures recognizing their idiosyncrasies as legitimate in God s eyes and in need of transformation like any human culture

Scripture and Knowledge Shlomo Biderman, 1995 Scripture and Knowledge clarifies the epistemological uses of scripture and examines some of the ways in which these uses have been understood in religious traditions The author contends that philosophers have neglected scripture as a means of understanding religion He shows the inadequacy of prevalent emphases on either the content or the social function of scripture as the sole measure of its role As the author demonstrates scripture has a unique epistemological aspect that of a framework that gives believers a total picture of the world and its significance A discussion of the knowledge claims made by scripture and of the authority by which these claims are justified is accompanied by extended examples from Jewish and Hindu sources *Thinking Through Rituals* Kevin Schilbrack, 2004

Thinking Through Rituals explores religious ritual acts and their connection to meaning and truth building upon their special status as virtually pure forms of belief in action

Theology and the First Theory of Sacrifice Ivan Strenski, 2003-11-01

Are social scientific theories and confessional theologies of sacrifice equally well suited as public discourse about religion

The French liberal Protestant theologians of the 5th Section of the *cole Pratique* and the French doyen of sociology mile Durkheim and his two main followers Henri Hubert and Marcel Mauss engage in a struggle over the proper approach to sacrifice in the public university The Durkheimians argued that theological language and assumptions were inappropriate for this purpose because of their confessional allegiances Another approach to sacrifice free of confessional entanglements was required This is what Hubert and Mauss sought to provide in the *Sacrifice Its Nature and Function*

Absorption Johannes Bronkhorst, 2012 This book argues for the central role played by absorption in the functioning of the human mind The importance of absorption makes itself felt in different ways the two studies combined in this book concentrate on two of them The first study argues that largely as a result of language acquisition humans have two levels of cognition which in normal circumstances are simultaneously active Mental absorption is a or the means to circumvent some perhaps all of the associations that characterize one of these two levels resulting in what is sometimes referred to as mystical experience but which is not confined to mysticism and plays a role in various religious phenomena and elsewhere The second study takes as point of departure some puzzling statements in the early Buddhist canon that raises serious questions of a psychological nature An essential element in the psychological theory proposed is the observation that mental absorption is a source of pleasure Since the human mind is in large part guided by pleasure which it seeks to repeat states of absorption leave memory traces that subsequently direct the mind However these memory traces do not recall the states of absorption themselves but rather the objects or circumstances that accompanied them The resulting activity of the mind differs in this way from person to person and can pursue wildly diverging goals

Publisher description

Extreme Religious Behaviours Johannes Bronkhorst, 2024-06-17 Certain religious behaviours clearly reduce biological fitness These behaviours include celibacy along with various forms of asceticism and rituals that harm the performer Such behaviours are found in widely different cultures How is this possible This book shows that these behaviours as is religion in general are by products of features of the human mind whose evolutionary fitness is beyond doubt and explores those features Which are those features This book proposes a twofold answer It draws attention to the layered nature of human consciousness in which different manners of experience are superimposed on each other This goes a long way toward accounting for the universal religious belief in some kind of transcendental world a higher reality different from ordinary reality The layering of consciousness comes about in childhood and gains in prominence with the acquisition of a first language which is the second feature highlighted in this book Together these features explain a variety of normal religious behaviours and beliefs and account for the possibility of mystical experience They also explain the occurrence of behaviours that do not augment evolutionary fitness
