even a phonetic value could be given Nevertheless they are often presented as complete decipherments to the public On this account the pretension that the Indus script is deciphered meets with increasing suspicion and is exposed to ridicule even Many scholars working in this field are nowadays of the opinion that the Indus script is altogether indecipherable if not a bilingual of considerable size turns up The approach to a decipherment presented in this volume makes avail of a short bilingual from Failaka but its master key is the discovering of the symbolic and the linguistic connection of the Indus signs with the R g Veda More than 200 inscriptions among them the longest and those with the most interesting motifs have been decoded here by setting them word after word in relation to R g Vedic mantras The results that were gained by this method of comparison for the pictographic and phonetic values of the Indus signs are surprising and far beyond the most daring phantasy i e beyond the analytic limits of thought This approach is the opposite of subjectivism The signs of all inscriptions have been found in this way have been collected in a sign dictionary improved for a great deal in the present edition By the deciphering of the Indus signs many problems of the R g Veda could be solved too and new insights be won for example in the question of the age of the Veda and the origin of its myths or the nature of the Soma plant
