Shang Civilization:

The Shang Dynasty Kirsty Holmes, 2020-07-15 The Shang Dynasty was the earliest recorded dynasty in China. It was in power for less than 600 years but they ruled during great advances in math, art, astronomy, and military technology. If life was so great during this time, why did the Shang Dynasty end? Invasion is one main reason that readers learn about in this compelling volume full of information about the civilization the Shang Dynasty created and about ancient China. Historical images and a timeline aid in comprehension of the social studies content included throughout. *Violence, Kinship and the Early Chinese State* Roderick Campbell, 2018-05-03 Situated between myth and history, the Shang has been hailed both as China's first historical dynasty and as one of the world's primary civilizations. This book is an up-to-date synthesis of the archaeological, palaeographic, and transmitted textual evidence for the Shang polity at Anyang c. 1250-1050 BCE. Roderick Campbell argues that violence was not the antithesis of civilization at Shang Anyang but rather its foundation in war and sacrifice. He explores the social economy of practices and beliefs that produced the ancestral order of the Shang polity. From the authority of posthumously deified kings to the animalization of human sacrificial victims, the ancestral ritual complex structured the Shang world through its key institutions of war, sacrifice, and burial. Mediated by hierarchical lineages, participation in these practices was basic to being Shang. This volume, which is based on the most up-to-date evidence, offers comprehensive and cutting-edge insight into the Chinese Bronze Age civilization. *Shang Civilization* Kwang-chih Chang, 1980 *China in the Early Bronze Age* Robert L. Thorp, 2006 One of the great breakthroughs in Chinese studies in the early twentieth century was the archaeological identification of the earliest fully historical dynasty of kings, the Shang, ca. 1300-1050 BCE. The last fifty years have seen major advances in all areas of Chinese archaeology, but recent studies of the Shang, their ancestors, and their contemporaries have been especially rich. Since the last English language overview of Shang civilization appeared in 1980, the pace of discovery has quickened. *China in the Early Bronze Age: Shang Civilization* is the first work in twenty-five years to synthesize current knowledge of the Shang for everyone interested in the origins of Chinese civilization. *China in the Early Bronze Age* traces the development of early Bronze Age cultures in North and Northwestern China from about 2000 BCE, including the Erlitou culture (often identified with the Xia) and the Erligang culture. Robert L. Thorp introduces major sites, their architectural remains, burials, and material culture, with special attention to jades and bronze. He reviews the many discoveries near Anyang, site of two capitals of the Shang kings. In addition to the topography of these sites, Thorp discusses elite crafts and devotes a chapter to the Shang cult, its divination practices, and its rituals. The volume concludes with a survey of the late Shang world, cultures contemporary with Anyang during the late second millennium BCE. Fully documented with references to Chinese archaeological sources and illustrated with more than one hundred line drawings, *China in the Early Bronze Age* also includes informative sidebars on related topics and suggested readings. Students of the history and archaeology of early civilizations will find *China in the Early Bronze Age* the most up-to-

date and wide ranging introduction to its topic now in print Scholars in Chinese studies will use this work as a handbook and research guide This volume makes fascinating reading for anyone interested in the formative stages of Chinese culture

Civilizations Felipe Fernandez-Armesto, 2001-09-14 In *Civilizations* Felipe Fernandez Armesto once again proves himself a brilliantly original historian capable of large minded and comprehensive works here he redefines the subject that has fascinated historians from Thucydides to Gibbon to Spengler to Fernand Braudel the nature of civilization To Fernandez Armesto a civilization is civilized in direct proportion to its distance its difference from the unmodified natural environment by its taming and warping of climate geography and ecology The same impersonal forces that put an ocean between Africa and India a river delta in Mesopotamia or a 2 000 mile long mountain range in South America have created the mold from which humanity has fashioned its own wildly differing cultures In a grand tradition that is certain to evoke comparisons to the great historical taxonomies each chapter of *Civilizations* connects the world of the ecologist and geographer to a panorama of cultural history In *Civilizations* the medieval poem Sir Gawain and the Green Knight is not merely a Christian allegory but a testament to the thousand year long deforestation of the trees that once covered 90 percent of the European mainland The Indian Ocean has served as the world s greatest trading highway for millennia not merely because of cultural imperatives but because the regular monsoon winds blow one way in the summer and the other in the winter In the words of the author Unlike previous attempts to write the comparative history of civilizations it is arranged environment by environment rather than period by period or society by society Thus seventeen distinct habitats serve as jumping off points for a series of brilliant set piece comparisons thus tundra civilizations from Ice Age Europe are linked with the Inuit of the Pacific Northwest and the Mississippi mound builders and the deforesters of eleventh century Europe are both understood as civilizations built on woodlands Here of course are the familiar riverine civilizations of Mesopotamia and China of the Indus and the Nile but also highland civilizations from the Inca to New Guinea island cultures from Minoan Crete to Polynesia to Renaissance Venice maritime civilizations of the Indian Ocean and South China Sea even the Bushmen of Southern Africa are seen through a lens provided by the desert civilizations of Chaco Canyon More here are fascinating stories brilliantly told of the voyages of Chinese admiral Chen Ho and Portuguese commodore Vasco da Gama of the Great Khan and the Great

Cultural Anthropology John H. Bodley, 2011-04-16 This introductory text introduces basic concepts in cultural anthropology by comparing cultures of increasing scale and focusing on specific universal issues throughout human history. Cultural materials are presented in integrated ethnographic case studies organized by cultural and geographic areas to show how ideological, social organization, and material features fit together in specific sociocultural systems. John H. Bodley explicitly seeks a balance between ecological, materialist, and cultural ideological explanations of sociocultural systems while stressing the importance of individual power seeking and human agency. Part One examines domestic scale autonomous tribal cultures. Part Two presents politically organized class based civilizations and ancient empires in the imperial world. Part Three surveys global industrial market based civilizations in the contemporary commercial world. **Cultural Anthropology** uniquely challenges students to consider the big questions about the nature of cultural systems.

Chinese Annals in the Western Observatory Edward Shaughnessy, 2019-11-18 Since the beginning of the twentieth century, hundreds of thousands of documents of all sorts have been unearthed in China, opening whole new fields of study and transforming our modern understanding of ancient China. While these discoveries have necessarily taken place in China, Western scholars have also contributed to the study of these documents throughout this entire period. This book provides a comprehensive survey of the contributions of these Western scholars to the field of Chinese paleography and especially to the study of oracle bone inscriptions, bronze and stone inscriptions, and manuscripts written on bamboo and silk. Each of these topics is provided with a comprehensive narrative history of studies by Western scholars as well as an exhaustive bibliography and biographies of important scholars in the field. It is also supplied with a list of Chinese translations of these studies as well as a complete index of authors and their works. Whether the reader is interested in the history of ancient China, ancient Chinese paleographic documents, or just in the history of the study of China as it has developed in the West, this book provides one of the most complete accounts available to date.

Ancient Lives Brian M. Fagan, 2016-07-15 Focusing on sites of key significance and the world's first civilizations, **Ancient Lives** is an accessible and engaging textbook which introduces complete beginners to the fascinating worlds of archaeology and prehistory. Drawing on their impressive combined experience of the field and the classroom, the authors use a jargon-free narrative style to enliven the major developments of more than three million years of human life. First introducing the basic principles, methods, and theoretical approaches of archaeology, the book then provides a summary of world prehistory from a global perspective, exploring human origins and the reality of life in the archaic world. Later chapters describe the development of agriculture and animal domestication and the emergence of cities, states, and pre-industrial civilizations in widely separated parts of the world. With this new edition updated to reflect the latest discoveries

and research in the discipline Ancient Lives continues to be a comprehensive and essential introduction to archaeology
