and of Americans who traveled abroad and brought back with them a passion for naturalizing exotics for scientific as well as aesthetic reasons The complexity of American gardens their combination of the historic and the modern and of foreign Paintings and Sculpture in the Collection of the cultures and local values is also their most distinctive characteristic National Academy of Design: 1826-1925 David Bernard Dearinger, National Academy of Design (U.S.), 2004 This is the first installment of a fully illustrated catalogue of the Academy s priceless collection of paintings and sculptures Shipman and the American Garden Judith B. culture as climate In this series of illustrated essays John Dixon Hunt takes us on a world tour of different periods in the making of gardens Hunt shows here how cultural assumptions and local geography have shaped gardens and their meaning He explores our continuing responses to land and reworkings of the natural world encompassing a broad range of gardens from ancient Roman times to early Islamic and Mughal gardens from Chinese and Japanese gardens to the invention of the public park and modern landscape architecture A World of Gardens looks at key chapters in garden history reviewing their significance past and present and tracing the recurrence of different themes and motifs in the design and reception of gardens throughout the world A World of Gardens celebrates the idea that similar experiences of gardens can be found in many different times and places including sacred landscapes scientific gardens urban gardens secluded gardens and symbolic gardens Featuring two hundred images this book is a treasure trove of ideas and inspiration whether your garden is a window box a secluded backyard or a daydream Warren H. **Porticoes and Painted Pergolas** Natsumi Nonaka, 2017-02-17 This book is the first study of the portico and its decorative program as a cultural phenomenon in Renaissance Italy Focusing on a largely neglected group of porticoes decorated with painted pergolas that appeared in Rome and environs in the sixteenth and early seventeenth centuries it tells the story of how an element of the garden the pergola became a pictorial topos in portico decoration and evolved hand in hand with its real cousin in the garden into an object for cultural emulation among the educated patrons of early modern Rome The liminality of both the portico and the pergola at the interface of architecture and garden is key to the interpretation of these architectural and painted forms which rests on the intersecting frameworks of the classical tradition natural history and the cultural identity of the aristocracy In the mediating space of the Renaissance portico the illusionism pergola created an art gallery a natural history museum and a virtual garden where one could engage in leisurely strolls learned conversations appreciation of art and scientific investigation as well as extensive travel across time and space The book proposes the interpretation that the illusionistic pergola was an artistic formula for the early modern perception of nature **Repair** Marcus Hall, 2005 Just as the restoration of Michelangelo's Last Judgment sparked enormous controversy in the art world so are environmental restorationists intensely divided when it comes to finding ways to rehabilitate damaged ecosystems Although environmental restoration is guickly becoming a widespread pursuit debate over the methods and goals of this endeavor often halts progress The same question confronts artistic and environmental restorationists Which systems need restoring and to what states should they be restored In Earth Repair A Transatlantic History of Environmental Restoration Marcus Hall explores the answer to this guestion while offering an alternative to the usual narrative of humans disrupting and spoiling the earth Hall's purpose is not to deny that humans have done lasting damage but to show that those who believed in restoration did not always agree on what they wanted to restore or how or to what form With quidance from the pioneer conservationist George Perkins Marsh the reader travels between the United States and Italy to see that restoration has taken many forms over the past two hundred years from maintaining and repairing to gardening and naturalizing By contrasting land management in these two countries and elsewhere Earth Repair clarifies different meanings of restoration shows how such meanings have changed through time and place and suggests how restorationists can apply these insights to their own practices **Encyclopedia of American Art Before 1914** Jane Turner, 2000 This alphabetically arranged volume covers all the major artistic developments in the USA from the Colonial period until 1914 with the start of World War I Academy Hill ,2000
