**Beyond Digital** Paul Leinwand, Mahadeva Matt Mani, 2022-01-04 Two world renowned strategists detail the seven leadership imperatives for transforming companies in the new digital era Digital transformation is critical But winning in today's world requires more than digitization It requires understanding that the nature of competitive advantage has shifted and that being digital is not enough In *Beyond Digital* Paul Leinwand and Matt Mani from Strategy PwC's global strategy consulting business take readers inside twelve companies and how they have navigated through this monumental shift from Philips's reinvention from a broad conglomerate to a focused health technology player to Cleveland Clinic's engagement with its broader ecosystem to improve and expand its leading patient care to more locations around the world to Microsoft's overhaul of its global commercial business to drive customer outcomes Other case studies include Adobe Citigroup Eli Lilly Hitachi Honeywell Inditex Komatsu STC Pay and Titan Building on a major new body of research the authors identify the seven imperatives that leaders must follow as the digital age continues to evolve Reimagine your company's place in the world Embrace and create value via ecosystems Build a system of privileged insights with your customers Make your organization outcome oriented Invert the focus of your leadership team Reinvent the social contract with your people Disrupt your own leadership approach Together these seven imperatives comprise a playbook for how leaders can define a bolder purpose and transform their organizations

*Data Analytics and AI* Jay Liebowitz, 2020-08-06 Analytics and artificial intelligence AI what are they good for The bandwagon keeps answering absolutely everything Analytics and artificial intelligence have captured the attention of everyone from top executives to the person in the street While these disciplines have a relatively long history within the last ten or so years they have exploded into corporate business and public consciousness Organizations have rushed to embrace data driven decision making Companies everywhere are turning out products boasting that artificial intelligence is included We are indeed living in exciting times The question we need to ask is do we really know how to get business value from these exciting tools Unfortunately both the analytics and AI communities have not done a great job in collaborating and communicating with each other to build the necessary synergies This book bridges the gap between these two critical fields The book begins by explaining the commonalities and differences in the fields of data science artificial intelligence and autonomy by giving a historical perspective for each of these fields followed by exploration of common technologies and current trends in each field The book also readers introduces to applications of deep learning in industry with an overview of

deep learning and its key architectures as well as a survey and discussion of the main applications of deep learning The book also presents case studies to illustrate applications of AI and analytics These include a case study from the healthcare industry and an investigation of a digital transformation enabled by AI and analytics transforming a product oriented company into one delivering solutions and services The book concludes with a proposed AI informed data analytics life cycle to be applied to unstructured data

Management of expenditure Great Britain: National Audit Office,2008-03-06 Holding managers to account for the resources they have been allocated is key to improving financial management at the Department for Environment Food and Rural Affairs This need has been recognised by the Department and reflected in a programme to improve its financial management but the Department s Management Board recognises that establishing a culture of tighter control over its expenditure will take time This initiative must remain a top priority and managers throughout the organisation will need to produce more reliable estimates of costs to justify their bids for resources and track the cost effectiveness of work done The budgets agreed by the Management Board at the outset of 2006 07 and 2007 08 exceeded the funds available In early 2006 07 increased spending to remedy difficulties with the Single Payment Scheme led to a risk of overspending in that year and the Department instigated a review which identified savings of 170 million against its original budget of 3 854 million During the early part of 2007 08 further commitments above the agreed budget allocations meant the Department was at risk of exceeding its spending limit by 140 million In July 2007 the Management Board identified savings which partially balanced the budget and continues to work towards a balanced budget for the year end Effective monitoring by the Management Board and greater integration between the systems for monitoring performance delivery and financial expenditure would help better management of budgets The NAO recommends that the Management Board set budgets from 2008 09 onwards that balance with the 2007 Comprehensive Spending Review and develops benchmarks to test the rigour of proposed budgets and to provide confirmation that these resource bids accord with the Department s strategic objectives
