Knowledge in Context Sandra Jovchelovitch, 2019-03-11. In this classic edition of her groundbreaking text *Knowledge in Context*, Sandra Jovchelovitch revisits her influential work on the societal and cultural processes that shape the development of representational processes in humans. Through a novel analysis of processes of representation and drawing on dialogues between psychology, sociology, and anthropology, Jovchelovitch argues that representation is a social psychological construct relating Self, Other, and Object world, which is at the basis of all knowledge. Exploring the dominant assumptions of western conceptions of knowledge and the quest for a unitary reason free from the impurities of person, community, and culture, Jovchelovitch recasts questions related to historical comparisons between the knowledge of adults and children, civilised and primitive peoples, scientists and lay communities, and examines the ambivalence of classical theorists such as Piaget, Vygotsky, Freud, Durkheim, and Lévy-Bruhl in addressing these issues. Featuring a new introductory chapter, the author evaluates the last decade of research since *Knowledge in Context* first appeared and reassesses the social psychology of the contemporary public sphere, exploring how challenges to the dialogicality of representations reconfigure both community and selfhood in this early 21st century. This book will make essential reading for all those wanting to follow debates on knowledge and

representation at the cutting edge of social cultural and developmental psychology sociology anthropology development and cultural studies **The Concise Corsini Encyclopedia of Psychology and Behavioral Science** W. Edward
