[The New Consumers](#) Norman Myers,Jennifer Kent,2013-04-10 While overconsumption by the developed world s roughly one billion inhabitants is an abiding problem another one billion increasingly affluent new consumers in developing countries will place additional strains on the earth s resources argue authors Norman Myers and Jennifer Kent in this important new book The New Consumers examines the environmental impacts of this increased consumption with particular focus on two commodities cars and meat that stand to have the most far reaching effects It analyzes consumption patterns in a number of different countries with special emphasis on China and India whose surging economies as well as their large populations are likely to account for exceptional growth in humanity s ecological footprint and surveys big picture issues such as the globalization of economies consumer goods and lifestyles Ultimately according to the orman Myers and Jennifer Kent the challenge will be for all of humanity to transition to sustainable levels of consumption for it is unrealistic to expect new consumers not to aspire to be like the old ones Cogent in its analysis The New Consumers issues a timely warning of a major and developing environmental trend and suggests

valuable strategies for ameliorating its effects *Education, Sustainability and the Ecological Social Imaginary* Jeff Buckles, 2018-05-23 This book analyses the evidence for global change and suggests that the Earth is going through a profound transformation caused in large part by human action Land oceans polar regions and the atmosphere are all being deeply affected by the human population's lifestyle what should the educational response be to these various aspects of global change To answer this the values of an ecological response are developed leading to the notion of an Ecological Social Imaginary which looks at how humans can change their way of living to one that is more in harmony with the planet that they live on and depend upon To enable this an ecological form of education Connective Education is proposed This focuses on how the human and natural world can be connected for the benefit of humankind and all living and non living entities joining head hand heart and spirit to the web of life It is argued that through Connective Education a particular type of person is formed one who is able to take their place in the human and natural world and in this way truly connect with their planet The book will be essential reading for those working in the fields of Education and Environmental Studies Sustainability David Mollica, 2017-03-02 Sustainability is one of the key concepts underlying our thinking about corporate responsibilities particularly with respect to the environment and inter generational justice but also in relation to corporate governance and the long term economic viability The advantages of the discourse of Sustainability are that it brings together contemporary economic and moral imperatives in the context of scientific knowledge Its disadvantages relate to its open ended content its systematic ambiguity and the internal tensions between economic growth human survival and global justice The essays in this volume reflect these strengths and weaknesses from a variety of viewpoints economic scientific social and philosophical They illustrate and illuminate the varied and contested content and utility of this currently popular concept and point to its multiple implications for the development of corporate responsibilities *Using NEPA to Combat Global Warming* David L. Keys, 2024-09-16 This book will help policy makers university students and the general public understand how the National Environmental Policy Act NEPA is intended to work and how it can be used to reduce greenhouse gas GHG emissions in order to combat global warming Unlike all other books on NEPA this book focuses on the global warming problem in terms of thermodynamics and entropy It explains how NEPA can help combat global warming by operationalizing the energy requirements and conservation potential analysis requirement in the Council on Environmental Quality CEQ regulations 40 CFR 1502.16(a)(7) and it puts the past present and future of the NEPA statute the CEQ regulations and energy analysis requirements all in one easy to find portable place It will be an excellent resource for university students and teachers policy analysts and those members of the public that want to know all about the NEPA Process As a third edition the book contains new analysis on the amended NEPA statute 2023 and revised CEQ regulations 2024 CEQ's January 9 2023 interim guidance on how to incorporate GHG emissions into NEPA documents the social costs of carbon the long term strategy of the United States to get to net zero GHG by 2050 assessing climate risk in NEPA reviews and the link between energy requirements

analysis required by 40 CFR 1502.16(a)(7) and reduced GHG emissions

Education and Sustainability Michelle Y. Merrill, Patricia Burkhardt-Holm, Chew-Hung Chang, Md Saidul Islam, Youngho Chang, 2017-09-13 This book provides an introduction to the state of sustainability education in Asia. It covers national policies, institutional policies and practices within Asian universities, sustainability considerations for teacher training at schools of education and pedagogical practices for sustainability in higher education. With contributors from universities and NGOs in Indonesia, Singapore, Malaysia, Thailand, the Philippines, Cambodia, India, China, and South Korea, this volume brings together the best papers from a series of successful international conferences on post-secondary education for sustainability in Asia. The book is organized into five parts. Part I focuses on paradigms for sustainability education. Part II looks at sustainability education contexts, strategies, and outcomes at the national level. Part III gives examples of sustainability programs and strategies adopted at specific universities. Part IV highlights sustainability education research from schools of education. Part V explores specific examples of post-secondary educational practices in sustainability.

Measuring Wellbeing: Towards Sustainability? Karen Scott, 2012-07-26 Improving wellbeing and sustainability are central goals of government, but are they in conflict? This engaging new book reviews that question and its implications for public policy through a focus on indicators. It highlights tensions on the one hand between various constructs of wellbeing and sustainable development and on the other between current individual and societal notions of wellbeing. It recommends a clearer conceptual framework for policy makers regarding different wellbeing constructs which would facilitate more transparent discussions. Arguing against a win-win scenario of wellbeing and sustainability, it advocates an approach based on recognising and valuing conflicting views where notions of participation and power are central to discussions. *Measuring Wellbeing* is divided into two parts. The first part provides a critical review of the field, drawing widely on international research but contextualised within recent UK wellbeing policy discourses. The second part embeds the theory in a case study based on the author's own experience of trying to develop quality of life indicators within a local authority against the backdrop of increasing national policy interest in measuring happiness. This accessible and informative book, covering uniquely both practice and theory, will be of great appeal to students, academics, and policy makers interested in wellbeing, sustainable development, indicators, public policy, community participation, power, and discourse.

Ecohouse Susan Roaf, 2007-08-31 Now in its 3rd edition, the bestselling *Ecohouse* continues to be both a technical guide and an inspiration for thousands of architects, designers, and eco-builders all over the world. As the need to slow climate change becomes increasingly urgent, growing numbers of people are looking to dramatically reduce the carbon footprint of their buildings by using more ecologically sound techniques. *Ecohouse* provides design information about the latest low-impact materials and technologies, showcasing the newest and best green solutions with international case studies demonstrating sustainable design in action around the world. This edition has been expanded to include advice on powering Ecohouses using renewable energy, including wind, micro-hydro, and heat pumps, and an

introduction to low impact building materials such as lime earth and hemp New case studies from across the globe have been added to inspire readers with real life examples of how to make an Ecohouse work Just reading this book won't save the world from the impact of climate change but if everyone from governments down to householders followed its advice we might just begin to turn the tide Additional audience Eco enthusiasts and green self builders will appreciate the handy hints and references on refurbishment and advice on how to kit out their Ecohouse with the greenest appliances and fittings Lecturers and students on sustainable design and construction courses will find the latest real world case studies fascinating and a great source of inspiration for their studio project work
