Susan Colbourn,2022-11-15 In *Euromissiles* Susan Colbourn tells the story of the height of nuclear crisis and the remarkable waning of the fear that gripped the globe In the Cold War conflict that pitted nuclear superpowers against one another Europe was the principal battleground Washington and Moscow had troops on the ground and missiles in the fields of their respective allies the NATO nations and the states of the Warsaw Pact *Euromissiles* intermediate range nuclear weapons to be used exclusively in the regional theater of war highlighted how the peoples of Europe were dangerously placed between hammer and anvil That made European leaders uncomfortable and pushed fearful masses into the streets demanding peace in their time At the center of the story is NATO Colbourn highlights the weakness of the alliance seen by many as the most effective bulwark against Soviet aggression Divided among themselves and uncertain about the depth of US support the member states were riven by the missile issue This strategic crisis was as much as any summit meeting between US president Ronald Reagan and Soviet general secretary Mikhail Gorbachev the hinge on which the Cold War turned *Euromissiles* is a history of diplomacy and alliances social movements and strategy nuclear weapons and nagging fears and politics To tell that history Colbourn takes a long view of the strategic crisis from the emerging dilemmas of allied defense in the early 1950s through the aftermath of the INF Treaty thirty five years later The result is a dramatic and sweeping tale that changes the way we think about the Cold War and its culmination      **NATO (Not for Individual Sale) G.**

Schmidt,2019-06-12 *NATO The First 50 Years* offers the first comprehensive study of the institution s activities and development over the past five decades Written by a team of international scholars it analyses the factors which have made NATO the most successful politico military alliance in history It also addresses the perennial problems of transatlantic relationships the problems that the Alliance grapples with today A wide ranging and masterful survey *NATO The First 50 Years* will be a useful reference work for researchers as well as an accessible guide for students      *The Logic of Internationalism* Kjell Goldmann,2002-11 Is internationalism plausible in today s world or must global relations be characterised by tension and war The author analyses internationalism s coercive and accomodative dimensions and considers practical problems      *Movement Genesis* Steven Breyman,2019-03-07 To make sense of the rise and fall origins and nature of the 1980s West German peace movement requires work that is part political sociology and part social movement theory building An analysis of the peace movement s organizations leadership strategy goals tactics and mobilization comprises the political sociology part of this study To un      **Why Movements Matter** Steve Breyman,2001-07-12 *Why Movements Matter* is a provocative account of how the Reagan administration relented to pressures created by international peace movements during one of the most dangerous episodes of the Cold War Breyman provides the first systematic account of the West German anti missile movement among the most important citizen mobilizations of postwar Western history Contrary to conventional wisdom Breyman offers compelling evidence that peace

movements rather than any escalation of Cold War spending or rhetorical belligerence hastened the demise of the Cold War. The product of extensive research, *Why Movements Matter* advances social movement theory and the political sociology of peace movements, expands our understanding of the interaction of political parties and political movements, explores the links between public opinion and organized dissent, and provides an assessment of a movement whose immediate impact shook the halls of power in Washington and Moscow yet also had a deep and lasting influence on politics, culture, and society.

**NATO Strategy and Nuclear Escalation** Stephen J. Cimbala, 1989. In this analysis of key doctrines, plans, and policies at the centre of the controversy about Western deterrence and defence, the author points to doctrinal deficiencies and examines NATO ideas on escalation and policy in terms of both logical consistency and implication for strategy.

**The Palgrave Handbook of Non-State Actors in East-West Relations** Péter Marton, Gry Thomasen, Csaba Békés, András Rácz, 2024-09-28. The Handbook introduces to readers accessibly for specialist and non-specialist scholars, students, and layman audiences the diverse universe of non-state actors (NSAs) that have played or are currently playing a significant role in the context of East-West relations from 1945 to the present. With a view to the oft-seen political debates about which non-state actors may be independent or controlled by particular states and in what ways they may be useful or harmful to the interests of particular actors, this volume is interested in analysing and assessing the relationship of NSAs to key state actors in the context of the politics of East-West relations. Key state actors in this context include more than just the United States on the one hand and the Soviet Union or Russia on the other hand. To offer a structured overview, the volume explores possible typologies of the relationships conceivable between NSAs and states. New concepts and organising principles are presented to support a process-tracing analysis of the evolution of proxy ships, partnerships, and other types of connections between states and non-state actors. Degrees, sources, and types of control and influence are considered. Further, the Handbook's chapters also examine NSAs' impact on the dynamics of interstate conflict and cooperation in the East-West dimension. The systematic examination of the relationship between states and NSAs in East-West relations proposed here is the first undertaking of its kind. International scholarship in political science and strategic analyses have so far neglected to develop an analytical framework and a truly nuanced understanding that could capture the intricate and multilevel relationships that exist between NSAs and states in this context.
