Smith, 2009 Offers an account of an eating history in America which focuses on a variety of topics ingredients and cooking styles **The Healthy Skeptic** Robert Davis, 2008-06-01 It happens every day we pick up a newspaper or magazine or turn on the television and are bombarded with urgent advice about how to stay healthy Lose weight Lower your cholesterol Early detection saves lives Sunscreen prevents cancer But in many cases pronouncements we rarely think to question turn out to be half truths that are being pushed by various individuals or groups to advance their own agendas The Healthy Skeptic explores who these health promoters are from journalists and celebrities to industry funded groups and consumer activists what their motives are and how they are spinning us in ways we often don't realize This treasure trove of little known facts written by a seasoned health reporter provides invaluable tips tools and resources to help readers think more critically about what they're being told Becoming a healthy skeptic is vital Davis argues because following the right advice can have a profound impact on overall health and longevity IN TEN ENTERTAINING CHAPTERS ROBERT J DAVIS DISCUSSES Diets and why they don't work Dietary supplements The campaign to reduce cholesterol Celebrity exhortations to get tested Sunscreen and its promoters claims The antichemical activists **Eating Anxiety** Chad Lavin, 2013-04-07 Debates about obesity are really about the meaning of responsibility The trend toward local foods reflects the changing nature of space due to new communication technologies Vegetarian theory capitalizes on

biotechnology's challenge to the meaning of species And food politics as this book makes powerfully clear is actually about the political anxieties surrounding globalization In *Eating Anxiety* Chad Lavin argues that our culture's obsession with diet obesity meat and local foods enacts ideological and biopolitical responses to perceived threats to both individual and national sovereignty Using the occasion of eating to examine assumptions about identity objectivity and sovereignty that underwrite so much political order Lavin explains how food functions to help structure popular and philosophical understandings of the world and the place of humans within it He introduces the concept of digestive subjectivity and shows how this offers valuable resources for rethinking cherished political ideals surrounding knowledge democracy and power Exploring discourses of food politics *Eating Anxiety* links the concerns of food especially issues of sustainability public health and inequality to the evolution of the world order and the possibilities for democratic rule It forces us to question the significance of consumerist politics and simultaneously the relationship between politics and ethics public and private **It's Not about**

Food Carol Emery Normandi, Laurelee Roark, 1999 Examines the physical emotional and spiritual problems behind eating disorders **Food and Drink in American History** Andrew F. Smith, 2013-10-28 This three volume encyclopedia on the history of American food and beverages serves as an ideal companion resource for social studies and American history courses covering topics ranging from early American Indian foods to mandatory nutrition information at fast food restaurants The expression you are what you eat certainly applies to Americans not just in terms of our physical health but also in the myriad ways that our taste preferences eating habits and food culture are intrinsically tied to our society and history This standout reference work comprises two volumes containing more than 600 alphabetically arranged historical entries on American foods and beverages as well as dozens of historical recipes for traditional American foods and a third volume of more than 120 primary source documents Never before has there been a reference work that coalesces this diverse range of information into a single set The entries in this set provide information that will transform any American history research project into an engaging learning experience Examples include explanations of how tuna fish became a staple food product for Americans how the canning industry emerged from the Civil War the difference between Americans and people of other countries in terms of what percentage of their income is spent on food and beverages and how taxation on beverages like tea rum and whisky set off important political rebellions in U S history **Candy** Samira Kawash, 2013-10-15 For most Americans candy is an uneasy pleasure eaten with side helpings of guilt and worry Yet candy accounts for only 6 percent of the added sugar in the American diet And at least it's honest about what it is a processed food eaten for pleasure with no particular nutritional benefit So why is candy considered especially harmful when it's not so different from the other processed foods from sports bars to fruit snacks that line supermarket shelves How did our definitions of food and candy come to be so muddled And how did candy come to be the scapegoat for our fears about the dangers of food In *Candy A Century of Panic and Pleasure* Samira Kawash tells the fascinating story of how candy evolved from a luxury good to a cheap

everyday snack After candy making was revolutionized in the early decades of mass production it was celebrated as a new kind of food for energy and enjoyment Riding the rise in snacking and exploiting early nutritional science candy was the first of the panoply of junk foods that would take over the American diet in the decades after the Second World War convenient and pleasurable for eating anytime or all the time And yet food reformers and moral crusaders have always attacked candy blaming it for poisoning alcoholism sexual depravity and fatal disease These charges have been disproven and forgotten but the mistrust of candy they produced has never diminished The anxiety and confusion that most Americans have about their diets today is a legacy of the tumultuous story of candy the most loved and loathed of processed foods Candy is an essential addictive read for anyone who loves lively cultural history who cares about food and who wouldn't mind feeling a bit better about eating a few jelly beans
