

A large, weathered stone tablet stands upright in a vast desert landscape. The tablet is covered in ancient, stylized script, possibly cuneiform or a similar early writing system. The desert floor is composed of sand with distinct, wavy ripples. In the background, there are rolling sand dunes under a bright blue sky with wispy white clouds. The overall scene conveys a sense of mystery and discovery.

Extinct Languages Johannes Friedrich, 2021-10-26 A noted linguist examines extinct languages from Egyptian hieroglyphs to the mysteries of as yet undeciphered writings in this scholarly work While certain ancient languages were passed down continuously through the ages many others were ignored for centuries When scholars began to decipher these extinct languages in the early nineteenth century they uncovered previously inaccessible riches of knowledge and history Yet much work remains to be done on undeciphered scripts that continue to tantalize and perplex us today In *Extinct Languages* linguist Johannes Friedrich guides readers through the fascinating world of recovered systems of writing including Egyptian and Hittite hieroglyphs Babylonian cuneiform and others He also explains the methodology and principles behind the deciphering process that will one day crack ancient mysteries such as the Indus Valley script

Endangered Languages Sarah G. Thomason, 2015-04-23 Most of the 7 000 languages spoken in the world today will vanish before the end of this century taking with them cultural traditions from all over the world as well as linguistic structures that would have improved our understanding of the universality and variability of human language This book is an accessible introduction to the topic of language endangerment answering questions such as what is it How and why does it happen Why should we care The book outlines the various causes of language endangerment explaining what makes a language safe and highlighting the danger signs that threaten a minority language Readers will learn about the consequences of losing a language both for its former speech community and for our understanding of human language Illustrated with case studies it describes the various methods of documenting endangered languages and shows how they can be revitalised

Lessons from Documented Endangered Languages K. David Harrison, David S. Rood, Arienne Dwyer, 2008-09-11 This volume represents part of an unprecedented and still growing effort to advance coordinate and disseminate the scientific documentation of endangered languages As the pace of language extinction increases linguists and native communities are accelerating their efforts to speak remember record analyze and archive as much as possible of our common human heritage that is linguistic diversity The window of opportunity for documentation is narrower than the actual lifetime of a language and is now rapidly closing for many languages represented in this volume The authors of these papers unveil newly collected data from previously poorly known and endangered languages They organize highly complex linguistic facts paradigms affixes vowel patterns while pointing out the theoretically challenging aspects of these Beyond this they reflect on the social and human dimensions discussing particular problems of nostalgia and modernity memory and forgetting and obsolescence and ethics while viewing language as not merely data on a page but as a living creation in the minds and mouths of its speakers

Lost Languages from the Mediterranean Jan G. P. Best, Fred C. Woudhuizen, 1989

Endangered Languages in the 21st Century Eda Derhemi, Christopher Moseley, 2023-02-24 *Endangered Languages in the 21st Century* provides research on endangered languages in the contemporary world the challenges still to be faced the work still to be done and the methods and practices

that have come to characterize efforts to revive and maintain disadvantaged indigenous languages around the world. With contributions from scholars across the field, the book brings fresh data and insights to this imperative but still relatively young field of linguistics. While the studies acknowledge the threat of losing languages in an unprecedented way, they focus on cases that show resilience and explore paths to sustainable progress. The articles are also intended as a celebration of the 25 years' work of the Foundation for Endangered Languages and as a parting gift to FEL's founder and quarter-century chair Nick Ostler. This book will be informative for researchers, instructors, and specialists in the field of endangered languages. The book can also be useful for university graduate or undergraduate students and language activists. Creating Orthographies for Endangered Languages Mari C. Jones, Damien Mooney, 2017-08-31

Creating an orthography is often seen as a key component of language revitalisation. Encoding an endangered variety can enhance its status and prestige. In speech communities that are fragmented dialectally or geographically, a common writing system may help create a sense of unified identity or help keep a language alive by facilitating teaching and learning. Despite clear advantages, creating an orthography for an endangered language can also bring challenges, and this volume debates the following critical questions: whose task should this be, that of the linguist or the speech community? Should an orthography be maximally distanced from that of the language of wider communication for ideological reasons, or should its main principles coincide for reasons of learnability? Which local variety should be selected as the basis of a common script? Is a multilectal script preferable to a standardised orthography? And can creating an orthography create problems for existing native speakers?

Language Diversity Endangered Matthias Brenzinger, 2015-07-31

This book presents a comprehensive overview of endangered languages with a global coverage. It features such well-known specialists as Michael Krauss, Willem F. H. Adelaar, Denny Moore, Colette Grinevald, Akira Yamamoto, Roger Blench, Bruce Connell, Tapani Salminen, Olga Kazakevich, Aleksandr Kibrik, Jonathan Owens, David Bradley, George van Driem, Nicholas Evans, Stephen A. Wurm, Darrell Tryon, and Matthias Brenzinger. The contributions are unique in analysing the present extent and the various kinds of language endangerment by applying shared general indicators for the assessment of language endangerment. Apart from presenting the specific situations of language endangerment at the subcontinental level, the volume discusses major issues that bear universally on language endangerment. The actual study of endangered languages is carefully examined, for example, against the ethics and pragmatics of fieldwork. Practical aspects of community involvement in language documentation are discussed, such as the setting up of local archives and the training of local linguists. Numerous case studies illustrate different language shift environments with specific replacing factors, such as colonial and religious conquests, migrations, and governmental language education. The book is of interest to students and scholars of linguistics, with particular focus on endangered languages and their documentation, typology, and sociolinguistics.

as well as to anthropologists and language activists

Archaeology and Language Colin Renfrew,1990-01-26 In this book Colin Renfrew directs remarkable new light on the links between archaeology and language looking specifically at the puzzling similarities that are apparent across the Indo European family of ancient languages from Anatolia and Ancient Persia across Europe and the Indian subcontinent to regions as remote as Sinkiang in China Professor Renfrew initiates an original synthesis between modern historical linguistics and the new archaeology of cultural process boldly proclaiming that it is time to reconsider questions of language origins and what they imply about ethnic affiliation issues seriously discredited by the racial theorists of the 1920s and 1930s and as a result largely neglected since Challenging many familiar beliefs he comes to a new and persuasive conclusion that primitive forms of the Indo European language were spoken across Europe some thousands of years earlier than has previously been assumed
