Childers, Stephen E. Cullenberg, 2008-11-25 Over the last two centuries artists critics philosophers and theorists have contributed significantly to such representations of the economy as sublime It might even be said that much of the emergence of a distinctly modern art in the West is inextricably linked to the perception of art's own autonomy and therefore its privileged mostly critical gaze at the terrible mixture of wonder and horror of capitalist economic practices and institutions The premise of this collection is that despite this perceptual sharing sublime economy has yet to be investigated in a purely cross disciplinary way Sublime Economy seeks to map this critical territory by exploring the ways diverse concepts of economy and economic value have been culturally constituted and disseminated through modern art and cultural practice Comprising of 14 individual essays along with an editors introduction Sublime Economy draws together work from some of the leading scholars in the several fields currently exploring the intersection of economic and aesthetic practices and discourses A pressing issue of this cross disciplinary conversation is to discern how artists writers and cultural scholars constructions of distinct conceptions of economic value as pertains to aesthetic objects as well as to more everyday objects and relations of mass consumption have contributed to the ways value functions in and across disparate discourses Thus this book looks at how cultural critics and theorists have put forward working notions of economic value that have regularities and effects similar to those of the expert conceptions and discourses about value that have been the preserve of professional economists **Photography: A Critical Introduction** Liz Wells, 2015-01-30 Photography A Critical Introduction was the first introductory textbook to examine key debates in photographic theory and place them in their social and political contexts and is now established as one of the leading textbooks in its field Written especially for students in higher education and for introductory college courses this fully revised edition provides a coherent introduction to the nature of photographic seeing Individual chapters cover Key debates in photographic theory and history Documentary photography and photojournalism Personal and popular photography Photography and the human body Photography and commodity culture Photography as art This revised and updated fifth edition includes New case studies on topics such as materialism and embodiment the commodification of human experience and an extended discussion of landscape as genre 98 photographs and images featuring work from Bill Brandt Susan Derges Rineke Dijkstra Fran Herbello Hannah Hoch Karen Knorr Dorothea Lange Chrystel Lebas Susan Meiselas Lee Miller Martin

Unpackaging Art of the 1980s Alison Pearlman, 2003-06-15 American art of the 1980s is as misunderstood as it is notorious Critics of the time feared that market hype and self promotion threatened the integrity of art They lashed out at contemporary art questioning the validity of particular media and methods and dividing the art into opposing camps While controversies have since subsided critics still view art of the 1980s as a stylistic battlefield Alison Pearlman rejects this picture which is truer of the period's criticism than of its art Pearlman reassesses the works and careers of six artists who became critics' biggest targets In each of three chapters she pairs two artists the critics viewed as emblematic of a given trend Julian Schnabel and David Salle in association with Neo Expressionism Jean Michel Basquiat and Keith Haring vis vis Graffiti Art and Peter Halley and Jeff Koons in relation to Simulationism Pearlman shows how all these artists shared important but unrecognized influences and approaches a crucial and overwhelming inheritance of 1960s and 1970s Conceptualism a Warholian understanding of public identity and a deliberate and nuanced use of past styles and media Through in depth discussions of works from Haring's body paintings of Grace Jones to Schnabel's movie Basquiat Pearlman demonstrates how these artists' interests exemplified a broader generational shift unrecognized by critics She sees this shift as starting not in the 1980s but in the mid 1970s when key developments in artistic style art world structures and consumer culture converged to radically alter the course of American art Unpackaging Art of the 1980s offers an innovative approach
