Metal Value Recovery from Industrial Waste Using Advanced Physicochemical Treatment Technologies

Dimitrios A Giannakoudakis,Papita Das,Parimal Pal,Jayato Nayak,Sankha Chakraborty,2024-11-13 Metal Value Recovery from Industrial Waste Using Advanced Physicochemical Treatment Technologies focuses on the fundamental and advanced topics involved with the technologies for the extraction of metal ions from different industrial discarded volumes which may be sludge or wastewater Uniqueness of the book lies in the fact that it covers each topic related to industrial wastes and elaborates on discussions on metal ion recovery to make the readers confident about the topics and concepts explained in the section Moreover this book examines high potential in different downstream processes like membrane filtration hybrid techniques chemical leaching electrochemical techniques and a variety of advanced recovery techniques Emphasis is given to state of the art concept latest research practical applications or commercialization through case studies and comparative evaluation of the processes for metal ion recovery from industrial wastes Provides updated occurrence and characteristics of a variety of high valued metal ions different industrial wastes Presents a detailed account of advanced chemical leaching technologies for the recovery of those metal ions Covers innovative approaches for the reutilization and management of industrial wastes in a very easily understandable way with visual elements so that the knowledge can reach out to all interested learners Describes specific metal recovery will contain the case studies wherever applicable to describe the lab to pilot scale to the industrial scale implementation **EPA's 33/50 Program Company Profile** ,1994 **Metals in Surface Waters**

Herbert E. Allen,George W Luther,Wayne Garrison,1997-10-01 Metals in Surface Waters presents state of the art research and applications on the full range of subjects including toxicity to aquatic organisms as well as humans with an emphasis on metals speciation The book explores metals contamination of surface waters from several different disciplines such as analytical chemistry aquatic chemistry and toxicology environmental engineering and oceanography *Clean Production* K.B. Misra,2012-12-06 The world has witnessed several revolutions since the dawn of industrial revolution some two centuries ago During the current century itself three revolutions in the area of communication information processing and quality have taken place and each time the standard of living of man improved beyond predictions But during the same

period the world population has also phenomenally increased dwarfing the gains achieved from the development. Increased level of industrial activity to meet the needs of humanity has caused irreversible damage to the pristine environment that the demand Earth once had. Economic disparity between the haves and have-nots has widened aggravating the situation further. More ozone layer depletion, warming up of Earth's atmosphere and the pollution created by uncontrolled industrial activity to gain economic strength are now assuming the proportion of a catastrophe that may eventually threaten the survival of life on Earth. Developed countries blame the Third World countries for the uncontrolled emissions through burning of fossil fuels and for wasting precious resources of energy by using inefficient and uneconomical technologies while the developed countries are equally responsible for avoidable over consumption and for the wastage of resources and energy and for not sharing the improved and efficient technologies with the developing countries. Thus the wastage by both these sets of countries continues unabated. After all resources of the world are finite and are meant to be shared by all its inhabitants.
