Millers Daughters:

Miller's Children James Garbarino, 2018-02-27 *Miller's Children* is a comprehensive look at the consequences of the US Supreme Court's decision in the case of *Miller v Alabama* which outlawed mandatory life without parole sentences for juvenile murderers. This book describes the author's fieldwork as a psychological expert witness in more than forty resentencing cases of juveniles affected by the Miller decision and follow-up rulings providing a wide-ranging review of research on human development in adolescence and early adulthood. It focuses on how and why convicted teenage murderers have been able to accomplish dramatic rehabilitation and transformation emphasizing the role of spiritual development, education, reflection, and mentoring in that process. Once Upon a Time There was a Little Girl Marcella Hannon Shields Ph. D., 2008-07 *Once Upon a Time There Was a Little Girl* shares the moving stories of seven women who as young girls experienced the early loss of their mothers through death or physical or emotional abandonment. The women explore their personal traumas through their responses to seven fairy tales in which there was no nurturing maternal presence. Dr. Marcella Shields is a psychologist with over thirty years of experience who reveals the inspiring journeys of these women who eventually triumph over suffering and learn to rely on the bond they have formed with each other to help reclaim their passion for life. By exploring seven timeless fairy tales in which the heroine finds her way through the grief of abandonment, the women offer a deeper understanding of the significance of the mother-daughter bond and the devastating consequences for the daughter if this bond is ruptured early. The poignant life stories and dreams courageously offered by these women show how fairy tales allowed them to understand and refashion themselves and provide a source of encouragement and hope for other women who have experienced early maternal loss. Fathers raising daughters without a consistent maternal presence will also find the reflections valuable.

Provisioning Paris Steven Laurence Kaplan, 2018-09-05 Dependence upon grain deeply marked every aspect of life in eighteenth-century France. Steven Kaplan focuses upon this dependence at the point where it placed the greatest strain on the state, the society, and the individual on the daily supply of grain and flour that furnished the staff of life. He reconstructs the history of provisioning in pre-industrial Paris and provides a comprehensive view of a culture shaped by the subsistence imperative. Who were the agents of the provisioning trade? What were their commercial practices? What sorts of relations did they maintain with each other? How did the authorities regulate their business? To answer these questions, Professor Kaplan combed the archives and libraries of France. He maps out the elementary structures of the trade and shows how they were transformed as a result of cultural and political as well as commercial and technological changes. In rich ethnographic detail, he evokes the day-to-day life of merchants, millers, bakers, brokers, and market officials. He shows how flour superseded grain and how the millers overtook the merchants in the provisioning process. He explores the tension between the suppliers' need for freedom and the consumers' need for security. Even as he weaves the intricate patterns of life inside and outside the marketplace, he never
