Students with Autism: How to improve language, literacy and academic success Katharine Beals, 2022-09-30 Beals describes the root causes of the language and learning challenges in autism their various academic consequences and a variety of tools and strategies for addressing them Drawing on what the most current evidence shows about the nature of autism and which therapies are most successful the book discusses the implications for autism friendly instruction in academic subjects noting the ways in which today's classrooms come up short and suggesting various adjustments that teachers can make Instead of focusing on social and behavioral issues general accommodations and general ways to address learning difficulties Beals zeros in on academics on accommodations within specific academic subjects and on techniques that target autism specific deficits situating the issue of educational access within the broader context of disability rights neurodiversity and debates about what disability rights and neurodiversity should encompass Complete acceptance of individuals on the autism spectrum must include complete educational access This means rethinking assumptions about autistic students about how we teach expressive language about how we teach reading comprehension and about what and how we teach in the many K 12 classrooms attended by autistic students **Autistic Intelligence** Douglas W.

Maynard, Jason Turowetz, 2022-05-25 As autism has become a widely prevalent diagnosis we have grown increasingly desperate to understand it Whether through baseless blame on vaccination or struggles to determine the potential genetic origins of autism Americans have devoted a great deal of thought to what autism is and where it comes from In *Autistic Intelligence* Douglas Maynard and Jason Turowetz focus on a different origin of autism the diagnostic process By turning to diagnosis they ask us to begin with the basic questions of what norms we measure autistic behavior against why we understand autistic behavior as disordered and how we go about assigning that disorder to particular people The authors take a close look at a clinic in which children are assessed for and diagnosed with autism They spent hours in assessment evaluations with psychologists pediatricians parents and children and the resulting data enabled them to make plain the systems language and categories that clinicians rely upon when making their assessments Those diagnostic tools determine the kind of information doctors can gather about children and indeed those assessments affect how children act Autism is not a stable category they show but the result of an interpretive act And in the process of diagnosing children with autism they argue we miss all of the unique contributions they make the world around them
