

## A Model Student

The purpose of education is to produce ideal persons to face the responsibilities of the future. This aim can be achieved only when the students are sincere and they acquire education in the real sense. Just copying a few questions and passing the examination is not an education. A student can never be educated until and unless he does not put his heart and should to the cause of education. A student is a person, who devotes himself to the pursuits of knowledge and learning. It is, therefore, the first and foremost duty of an ideal student to seek knowledge.

### What should do to be an ideal student?

The pursuit of knowledge demands hard work and full devotion. Unfortunately, students do not realize their duties. They have confined education. Their greatest purpose is to get a good grade in the examination by hook or by crook. They adopt all the foul means to get through the examinations. The ideal student enriches himself with knowledge. In practical life, only those students come out with the best colours, who had to acquire knowledge. An ideal student enjoys learning. He goes deep and deep in search of knowledge.

He is not a bookworm. He knows that a healthy body is necessary for a healthy mind. He takes interest in all the activities that promote his physical health. He goes to the playground with the same pleasure and enthusiasm with which he studies in the library. An ideal student is not unsocial. He loves his fellow students and takes part in all the collective activities. The ideal student respects and honours his teachers. He knows the place of teachers, who are opening the gate of glories for him. He is humble and obedient.

The more he learns from his teachers, the more grateful he is to them. The more knowledge he gets, the more humble he becomes. An ideal student is not a frog in a well but a person with greater visions and ideals. He is regular and punctual. He does not participate in adverse and negative activities. He confines himself to his studies and task. He does not waste his time in useless deeds. He does not keep an association with such elements whose purpose is to damage the cause of education. He believes in simple and plain living. He is kind and generous.

The responsibility of a student school is very important. If something, where to happen to him/her the person's life at school, could be majorly affected. There is a way through to help: the person can work at getting good grades, studying hard, and facing the consequences of his action. Some people say that their responsibility at school isn't to be worried about, but it is, and here are few ways to help. First, is getting good grades. If students don't have good grades, or the responsibility to get them, they can be in a lot of trouble.

*Sixth International Conference on Cognitive Modeling* Marsha C. Lovett,Christian D. Schunn,Christian Lebiere,Paul Munro,2004-09-15 The International

Conference on Cognitive Modeling brings together researchers who develop computational models to explain and predict cognitive data. The core theme of the 2004 conference was Integrating Computational Models encompassing an integration of diverse data through models of coherent phenomena, integration across modeling approaches and integration of teaching and modeling. This text presents the proceedings of that conference. The International Conference on Cognitive Modeling 2004 sought to grow the discipline of computational cognitive modeling by providing a sophisticated modeling audience for cutting edge researchers in addition to offering a forum for integrating insights across alternative modeling approaches in both basic research and applied settings and a venue for planning the future growth of the discipline. The meeting included a careful peer review process of 6 page paper submissions, poster abstracts to include late breaking work in the area, prizes for best papers, a doctoral consortium and competitive modeling symposia that compare and contrast different approaches to the same phenomena. Successful Strategies for Teaching Undergraduate Research Marta Deyrup, Beth Bloom, 2013-09-11

Editors Marta Deyrup and Beth Bloom have brought together well known educators from the fields of library science, communication, composition and education to show you how to develop successful strategies for teaching undergraduates how to conduct basic research and write papers. Chapters cover each step of the research process beginning appropriately with separate pieces from a librarian and from an academic on how to construct good research assignments. Following chapters cover establishing the research question, assessing the research process, information ethics and the protocols of research and using new modes and media to communicate research findings. The book fully explores current theories on pedagogy and provides practical demonstrations of how library instruction can reinforce critical thinking and set the groundwork in place for life long learning. Each chapter contains an extensive bibliography for further reading.

**Exemplary Teachers of Students in Poverty** Geoff Munns, Wayne Sawyer, Bronwyn Cole, 2013. This book does not shy away from the complexity of the factors that influence educational engagement for poor students but it does take seriously the notion that teachers can make a difference for those students. **Automated Essay Scoring** Mark D. Shermis, Jill C.

Burstein, 2003-01-30. This new volume is the first to focus entirely on automated essay scoring and evaluation. It is intended to provide a comprehensive overview of the evolution and state of the art of automated essay scoring and evaluation technology across several disciplines including education, testing and measurement, cognitive science, computer science and computational linguistics. The development of this technology has led to many questions and concerns. Automated Essay Scoring attempts to address some of these questions including: How can automated scoring and evaluation supplement classroom instruction? How does the technology actually work? Can it improve students' writing? How reliable is the technology? How can these computing methods be used to develop evaluation tools? What are the state of the art essay evaluation technologies and automated scoring systems? Divided into four parts, the first part reviews the teaching of writing and how computers can contribute to it. Part II analyzes actual automated essay scorers including e-rater™, Intellimetric and the

Intelligent Essay Assessor The third part analyzes related psychometric issues and the final part reviews innovations in the field This book is ideal for researchers and advanced students interested in automated essay scoring from the fields of testing and measurement education cognitive science language and computational linguistics **UPRT 2019** Adrienn Fekete, Magdolna Lehmann, Krisztián Simon, 2021-03-23 A collection of papers presented at UPRT 2019 at the University of Pcs Hungary **Structures and Architecture - Bridging the Gap and Crossing Borders** Paulo J.S.
