Modeling The Attrition Of Military Pilots:

Modeling the Departure of Military Pilots from the Service Marc N. Elliott, Kanika Kapur, Carole Roan Gresenz, 2004 High numbers of voluntary departures from the services by military pilots have periodically caused considerable concern among military administrators and policymakers both recently and in previous periods of high attrition In this study the authors explore some determinants of the fixed wing airplane pilot attrition problem among male pilots in the Air Force Navy and Marine Corps and the responsiveness of attrition to changes in military compensation The authors estimated a pilot attrition model that examines the impact on attrition from factors such as compensation civilian airline hiring and deployment This study produced several noteworthy findings including 1 Increases in major airline hiring tend to increase military pilot voluntary departures to a great degree in the Air Force and to a lesser extent in the Navy 2 although attrition was found to be quite responsive to bonus pay counteracting a sizable increase in major airline hiring could be costly particularly for the Air Force 3 the significant Impact of civilian major airline hiring on pilot attrition calls for a pilot management plan that will enable the armed forces to respond to strong outside in

Modeling the Departure of Military Pilots From the Services, 2004 High numbers of voluntary departures from the services by military pilots have periodically caused considerable concern among military administrators and policymakers both recently and in previous periods of high attrition In this study we explore some determinants of the fixed wing airplane pilot attrition problem among male pilots in the Air Force Navy and Marine Corps and the responsiveness of attrition to changes in military compensation We estimated a pilot attrition model that examines the impact on attrition from factors such as compensation deployment voluntary separation programs and civilian airline hiring Data sources include military personnel files and information on civilian airline hiring and compensation The model is simplified in order to abstract from complex modeling issues such as the existence of multiple decision points and bonus contracts of differing lengths We focus on voluntary attrition within a few years of the end of the initial service obligation Although we were able to verify the insensitivity of our results to a number of specification and sample checks our results do depend on a number of simplifying assumptions that may not be fully testable Results from the pilot attrition model should therefore be interpreted in light of these assumptions

Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume I Nigel Askey, 2013-06-01 In June 1941 the Wehrmacht launched Operation Barbarossa the attack on the USSR and the largest land invasion in recorded history Operation Barbarossa the Complete Organisational and Statistical Analysis and Military Simulation focuses on 1941 when the USSR came closest to defeat It includes full analyses of the belligerents armed forces weapons equipment personnel transport logistics war production mobilisation and replacements The work employs a unique military simulation methodology extending from the tactical to the strategic level and applies this methodology to each of the belligerents Volume I the first of six volumes is primarily concerned with the structure of this methodology but uses many of the events and weapons from Operation

Barbarossa as illustrative case studies The complete work represents the most historically accurate advanced and comprehensive analysis of the first six months of the largest and most decisive military campaign of WWII
