The Railway Magazine, 2002 **Model Railroads** Cyril John Freezer, 1991 Briefly explains how to choose the rolling stock for a model railway how to make buildings and scenery and how to put it all together in a permanent or portable layout

Modelling Branch Lines David Wright, 2015-08-31 This comprehensive book is aimed at all those railway modellers who wish to create a realistic model of a branch line First of all it examines the origins developments and future of branch lines in Britain and then provides useful insights into how to select a suitable branch line to model It discusses in detail how to create scenic realism and an appropriate setting for the model with reference to the landscape the infrastructure the lineside and the use of authentic colour Detailed information about a selection of several real and some fictitious branch lines are presented in order to inspire the modeller and help him to select a suitable subject to lovingly recreate Finally track plans and superb drawings of the whole scene are shown which provides the modeller with a visual interpretation of what the completed model should look like **The British National Bibliography** Arthur James Wells, 2009 **Model Railroad Craftsman**, 1970

Modellers Guide Peter Swinger, 2002 Although overshadowed in operational terms by the London North Eastern Railway's prestigious Pacific locomotives and outnumbered numerically by the 4 6 0s designs of both the LMS and GWR the various classes of 4 6 0 operated by the LNER were arguably among the most successful of the wheel arrangement to be constructed in Britain While a number were inherited from the pre Grouping companies most notably the North Eastern and Great Eastern the design can be said to have come of age with two of the all time classic types Gresley's Class B17 and Thompson's Class B1 The former with their evocative names linked to country houses in East Anglia and football teams in the area served by the LNER and the latter many named after African antelopes were hugely successful In

the first of the new Modeller's Guide series Peter Swinger whose earlier books for OPC on the various types of LNER 4 6 0s helped establish him as one of the leading experts on the subject provides a detailed reference work to the many designs of 4 6 0 both inherited by and designed for the LNER. Comprehensively illustrated throughout in both colour and mono the book describes in depth each of the individual classes providing readers with information useful in converting many of the proprietary models now available of the types. Along the excellent illustrative selection the author's well researched text is an excellent introduction to the history and operation of the various types.
